Russia Modern Industrial:

New Rich, New Poor, New Russia Bertram Silverman, Murray Yanowitch, 2016-07-08 Now expanded to cover the consequences of Russia's 1998 financial collapse this book focuses on the social consequences of a modern day great depression The text examines the unequal distribution of the costs and benefits of Russia's leap into capitalism The topics covered include the emergence of the new poor the recruitment of a business elite the changing social and economic status of women and the impact of marketization on employment The study draws on a range of statistics and survey research data to present a portrait of the lives and circumstances of contemporary Russians **Government, Industry and**

Rearmament in Russia, 1900-1914 Peter Gatrell, 1994-03-10 This book provides an economic historian's perspective on major questions that confront all students of Russian history how stable were the economic and administrative structures of late imperial Russia and how well prepared was Russia for war in 1914 The decade following the Russo Japanese War witnessed profound changes in the political system and in the industrial economy The regime faced challenges to its authority from industrialists caught in the throes of recession and from parliamentary critics of tsarist administration Peter Gatrell provides a comprehensive account of the attempts made by government and business to confront these challenges examining the organisation and performance of a key industry and showing how decisions were reached about the allocation of resources and the far reaching consequences these decisions entailed *The Coming of New Industrial State* Sergey

Bodrunov, 2024-02-20 The book explores the effect of modern technological shifts on human society showing that technologies are undergoing accelerating qualitative changes that open up new opportunities for personal development and satisfaction of wants and simultaneously engender risks associated with growing opportunities of human interference with nature and technogenic stress on the environment Based on the study of cutting edge technologies and resulting socioeconomic shifts Bodrunov's analysis outlines the shape of the civilizational crisis we face It can only be overcome by founding a new industrial society of the second generation if we consider the new industrial state described by J K Galbraith as the first generation reliant on knowledge intensive material production and the gradual removal of humans from immediate material production **Civil Society in Putin's Russia** Elena Chebankova, 2013-03-05 Unlike other books on

civil society in Russia which argue that Russia's civil society is relatively weak and that democratisation in Russia went into reverse following Vladimir Putin's coming to power this book contends that civil society in Russia is developing in a distinctive way It shows that government and elite led drives to encourage civil society have indeed been limited and that the impact of external promotion of civil society has also not been very successful It demonstrates however that independent domestic grassroots movements are beginning to flourish despite difficulties and adverse circumstances and that this development fits well into the changing nature of contemporary Russian society Russia, Her Strength and Her Weakness

Big Business In Russia Jonathan A. Grant, 2010-11-23 Jonathan A Grant has written a highly original study of the Putilov works the most famous industrial conglomerate in the Russian Empire during the late nineteenth and early twentieth centuries With the emergence of a capitalist system in the Russian federation in the 1990s scholarly debate over the nature of Russian capitalism has been revived and with this study Grant issues a major challenge to the conventional wisdom on the nature of the Russian economy in the years before the Bolshevik revolution Grant argues that the Putilov Company which manufactured arms for the Russian state and a wide range of heavy industrial equipment for civilian use adopted business practices that resembled the experiences of large machinery and armaments manufacturers in Britain France the Austro Hungarian Empire and Germany This interpretation runs directly counter to the traditional and widely held view that Russian capitalism was shaped by the tsarist state s orders and subsidies and that the tsarist system was incompatible with the

development of modern capitalism Grant makes direct comparisons between Putilov and the famous western firm of Krupp and Vickers illustrating similar business decisions made by both companies in terms of diversification of the product line and a penchant for private as opposed to state markets for primary income Grant has gone beyond Soviet works on the Putilov plant examining archival documents of the company and offering critical comments on both Soviet and Western scholarship on Russian economic and social history from the perspective of this important industrial enterprise Grant not only repeatedly demonstrates that the Putilov firm responded effectively to the changing market for its wide range of industrial products but also shows that the tsarist regime provided far more of the systemic regularity needed for capitalist development than generally believed Grant's work is a significant contribution to this ongoing debate offering a much needed case study of Russian business history and a comparative study that extends across national boundaries Big Business in Russia is essential reading for graduate students in Russian and European history and will also appeal to American and European business leaders eager to understand the historical background of the current economic challenges facing Russia **Russia**,

Russia Jean Radvanyi, Marlene Laruelle, 2023-07-27 Thirty years after the end of the Soviet Union multiple ghosts haunt Russia its elites and its society from concern over demographic and economic decline to worry about the country's vulnerability to external intervention reviving the old notion of Russia as a besieged fortress Faced with both a West that emerged victorious from the Cold War and a shockingly dynamic China Russia constantly questions its identity and the notion that its fate is to bridge East and West This book offers a comprehensive overview of Russia's fears and challenges that could help the American public to understand how the country deals with its own issues and how this influences Russia's foreign policy including the ongoing war in Ukraine This is critical to understanding Russia's international stance and its impact on US policy and security **Russia** William A. Dando, Zoran Pavlovic, Charles F. Gritzner, Anna R. Carson, Carol Z. Dando, 2007 Russia is the world's largest country it is nearly twice the size of both China and the United States and it stretches over 11 time zones It consists of vast plains and the nation has an abundance of natural resources This work contains information that guides students through the history geography culture and economy of this country **Unattainable Bride Russia** Ellen Rutten, 2010-03-08 Throughout the twentieth century and continuing today personifications of Russia as a bride occur in a wide range of Russian texts and visual representations from literature and political and philosophical treatises to cartoons and tattoos Invariably this metaphor functions in the context of a political gender allegory which represents the relationships between Russia the intelligentsia and the Russian state as a competition of two male suitors for the former's love In Unattainable Bride Russia Ellen Rutten focuses on the metaphorical role the intelligentsia plays as Russia's rejected or ineffectual suitor Rutten finds that this metaphor which she covers from its prehistory in folklore to present day pop culture references to Vladimir Putin is still powerful but has generated scarce scholarly consideration Unattainable Bride Russia locates the cultural thread and places the political metaphor in a broad contemporary and social context thus paying it

the attention to which it is entitled as one of Russia's modern cultural myths Industry, State, and Society in Stalin's Russia, 1926-1934 David R. Shearer, 2018-09-05 In his reexamination of the origins of the Stalinist state during the formative period of rapid industrialization in the late 1920s and early 1930s David R Shearer argues that a centralized state controlled economic system was the consciously conceived political creation of Stalinist leaders rather than the inevitable by product of socialist industrialization Focusing on the different economic and bureaucratic cultures within the industrial system Shearer reconstructs the debates in 1928 and 1929 over administrative financial and commercial reform He uses information from recently opened archives to show that attempts by the state's trading organizations to create a commercial economy enjoyed wide support offering a model that combined planning and rapid industrialization with social democracy and economic prosperity In an effort to crush the syndicate movement and establish tight political control over the economy Stalinist leaders intervened with a program of radical reforms Shearer demonstrates that professional engineers planners and industrial administrators in many cases actively supported the creation of a powerful industrial state unhampered by domestic social and economic constraints The paradoxical result Shearer shows was a loss of control The overly centralized system that emerged during the first Five Year Plan was rendered incoherent by periodic economic crises and the continuing influence of partially suppressed social and market forces *The Soviet Colossus* Michael G. Kort, 2015-05-18 The twentieth century was not kind to Russia Despite its great potential and remarkable achievements the country also bore the weight of two world wars a revolution and civil war totalitarian tyranny famine and ecological destruction economic ruin and imperial decline Will Russia ever be prosperous peaceful and free Seeking clues in the past Michael Kort revisits earlier turning points in Russia's history from the fall of the old regime to the establishment of the Bolshevik dictatorship and Stalinist totalitarianism from the reforms and counter reforms of Khrushchev and Brezhnev to the tumultuous years of change under Gorbachev and Yeltsin Which strands of Russia's past is their successor Vladimir Putin weaving into the fabric of the present and which are being allowed to fade for better or worse This new edition of *The Soviet Colossus* brings the story up through the first decade of the twenty first century Distinctively readable judicious and focused on critical events and questions it integrates new revelations about the Soviet past and ongoing debates about the Soviet regime as well as its successor It is the ideal text for as one semester history course or background for a political science course **Strategic Asia 2009-10: Economic Meltdown and Geopolitical Stability** Ashley J. Tellis, Mercy Kuo, Andrew Marble, 2009 Examines the effects of the global economic crisis on the economic performance and strategic goals of selected Asian states Discusses implications of the crisis for the power and hegemony of the United States Considers attitudes of Asian powers toward nuclear nonproliferation and disarmament **The American Review of Reviews** Albert Shaw, 1917 The American Review of Reviews , 1917 *Europe in the Nineteenth Century* Harry Hearder, 2014-01-21 The period between 1830 and 1880 was one of immense activity radical political change and striking economic and social growth in Europe The major themes of the

struggles between individuals parties and classes within the state and between the states themselves are explored within the context of a study of the administration organisation and growth of European society The whole book has been fully revised and updated particularly the section on German history Professor Hearder has also given greater consideration to many important issues such as popular movements of protest and insurrection life styles and the role of women
