Education and Disability in Cross-Cultural Perspective Susan Jeanne Peters, 2013-11-26 A radical departure from previous chronicles of education for people with disabilities this book views special education from a broader perspective Its central thesis is that cultural values and expectations play a dominant role in understanding the structure and function of special education While theories of the social construction of disability have been written about in a growing body of research since the 1960s no attempt has been made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included

Politics, Modernisation and Educational Reform in Russia David Johnson, 2010-05-17 The chapters in this volume give an account of the process of modernisation and educational reform in Russia variously considering the cultural and

political dilemmas provoked by democratisation the structural and policy challenges associated with the reform of higher and vocational education and the deep divisions exposed as socio cultural activity is brought into alignment with the new discourse of freedom and choice The volume stimulates an important debate about the methods that inform cross national and cross regional work on educational change This is particularly salient in a study of educational reform in Russia and begs the question whose way of thinking of constructing meaning and of experiencing the world is used to judge the weight and the direction of change Each chapter shows that a thorough understanding of the nature of change and the direction of reform is only achieved through the ability to decentre or take on board the other worldview It argues therefore that it is worldview rather than culture or nation state that is the most valid unit of analysis This book pays tribute to K D Ushinsky 1824-70 the Russian pioneer of comparative education each chapter in it broadly in agreement with his conclusions that Public education does not solve the problems of life by itself it does not lead history rather it follows the historical development It is not the pedagogies or the teachers who create the future but the people themselves and their great men Education only follows this road and in combination with other public social factors helps the individual and the rising generation on its way

The Unification of German Education Val Dean Rust, Diane Rust, 1995

This study of the integration of East and West German education following the collapse of the German Democratic Republic in 1989 focuses on policy formation and implementation during this period of great social and political turbulence It is the result of a research project undertaken shortly after the unification The authors lived in East Germany for a full year looking carefully at individual schools vocational training centers teacher colleges and universities They asked macro analytic questions What are the conditions in which educational policy is successfully formulated How is this educational policy implemented What are the consequences of this policy From the start West Germany demanded a complete dismantling of the educational system in the former German Democratic Republic West German political leaders insisted as a condition of unification that all important agreements concerning education made by the GDR states be accepted by the new states The authors research shows that even before the unification East Germans had already opted for a system consistent with West German education law However the West Germans disregarded these changes and imposed their own version of reform on East Germany The study reveals that in this period of confusion the East Germans did not fully analyze the implications of the imposed conditions which now have unforeseen negative consequences The German situation is of great interest to all educators particularly students of educational policy making as well as researchers in political
