*Russian Aviation and Air Power in the Twentieth Century* Robin Higham, John T. Greenwood, Von Hardesty, 1998 In 1977 Robin Higham and Jacob Kipp edited *Soviet Aviation and Air Power* the first comprehensive study of Russian aviation This new volume brings together both new editors and new contributors to take a fresh look at Russian and Soviet aviation in the twentieth century Since the collapse of the Soviet Union in 1990 new archives have become available as well as new perspectives and all the contributors to this new volume have based their research on newly available material While some chapters update those in the 1977 work most break new ground such as those dealing with the aircraft industry the designers and Soviet Air combat on the periphery *Russian Aviation and Air Power in the Twentieth Century* John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes Cinematic Cold War Tony Shaw, Denise Jeanne Youngblood, 2010 The first book length survey of cinema s vital role in the Cold War cultural combat between the U S and the USSR Focuses on 10 films five American and five Soviet both iconic and lesser known works showing that cinema provided a crucial outlet for the global debate between democratic and communist ideologies **Red Spies in America** Katherine Amelia Siobhan Sibley, 2004 The most detailed study of Soviet military industrial espionage during the 1930s 1940s and 1950s spying aimed specifically at acquiring restricted information and materials relating to American industry technology and science Peace Research Abstracts Journal, 2000 *Contemporary Authors*, 2005

**Encyclopedia of Flight: Stabilizers - Ferdinand von Zeppelin** Tracy Irons-Georges, 2002 The Encyclopedia of Flight bridges the gap between theoretical concepts and practical applications between scientific information and historical issues This three volume work provides information about animal and human made flight in a way that is accessible to high school and undergraduate students general readers and aviation enthusiasts It examines a wide range of topics from birds and balloons to jets and spacecraft *The B-45 Tornado* John C. Fredriksen, 2009-09-08 The North American B 45 Tornado was America s first jet bomber and was used in a number of vital missions for nearly a decade Drawing from declassified secret documents this history explains the bomber s use in strategic reconnaissance and atomic weapon strike missions from its 1944 development to its role in the Cold War The book includes numerous photographs and more than 100 interviews with pilots navigators and ground personnel *Red Wings Over the Yalu* Xiaoming Zhang, 2002 The Korean conflict was a pivotal event in China s modern military history The fighting in Korea constituted an important experience for the newly formed People s Liberation Army Air Force PLAAF not only as a test case for this fledgling service but also in the later development of Chinese air power Xiaoming Zhang fills the gaps in the history of this conflict by basing his research in recently

declassified Chinese and Russian archival materials He also relies on interviews with Chinese participants in the air war over Korea Zhang's findings challenge conventional wisdom as he compares kill ratios and performance by all sides involved in the war Zhang also addresses the broader issues of the Korean War such as how air power affected Beijing's decision to intervene He touches on ground operations and truce negotiations during the conflict Chinese leaders placed great emphasis on the supremacy of human will over modern weaponry but they were far from oblivious to the advantages of the latter and to China's technological limitations Developments in China's own air power were critical during this era Zhang offers considerable materials on the training of Chinese aviators and the Soviet role in that training on Soviet and Chinese air operations in Korea and on diplomatic exchanges over Soviet military assistance to China He probes the impact of the war on China's conception of the role of air power arguing that it was not until the Gulf War of the early 1990s that Chinese leaders engaged in a broad reassessment of the strategy they adopted during the Korean War Military historians and scholars interested in aviation and foreign affairs will find this volume of special interest As a unique work that presents the Chinese point of view it stands as both a complement and a corrective to previous accounts of the conflict

**Pioneer Aviators of the World** Hart Matthews, 2003 Most people recognize brothers and bicycle mechanics Wilbur and Orville Wright as the first in flight and know that in 1903 on the blustery sand dunes of Kitty Hawk North Carolina they made history with a flying machine of their own invention But few other people know that the next aviator after the Wright brothers a Brazilian flew almost three years later and was nevertheless widely credited as being the first in flight Or that a world famous escapologist

a Hungarian made the first flights in Australia but afterwards never flew again Or that in Spain the first public display of a flying machine led to religious riots The first pilots from each of a hundred countries have their stories told in this work A brief biography and description of his or her attempts to fly are provided for each early aviator except in a very few cases where facts are hard to find For purposes of this book a flight is defined as that made by a heavier than air machine capable of taking off from ground level carrying a pilot who controls to some degree the ascent descent and path of the machine To be called successful the flight must be sustained past the point to which the machine's take off momentum would normally carry it through the air
