Soviet/Russian Armor and Artillery Design Practices, 1995 *Visualizing Russia* Cynthia Hyla

Whittaker, 2010-07-14 The Romantic search for a national past was a European preoccupation in the first half of the nineteenth century In Russia this process led to the formation of the Russian style that has to today so captivated the world s imagination While the manifestations of this style are easily recognizable in gleaming gilt vibrant colors onion domes peasant costume and tsarist regalia hardly anyone has realized the pioneering and defining role that Fedor Solntsev 1801 1892 played in the development of a Russian national aesthetic This book rescues Solntsev from obscurity and celebrates his major contributions to the arts archaeology architecture ethnography icon painting restoration work and Russian nationalist ideology as well as place his work in a general European context Contributors include Marc Raeff Wendy Salmond Richard Wortman Anne Odom Irina Bogatskaia Marina Evtushenko Olenka Pevny Irina Reyfman Nathaniel Knight Lauren M O

Connell and J Robert Wright **The New Russian Book** Birgitte Beck Pristed, 2017-08-01 This book takes up the obtrusive problem of visual representation of fiction in contemporary Russian book design By analyzing a broad variety of book covers the study offers an absolutely unique material that illustrates a radically changing notion of literature in the transformation of Soviet print culture to a post Soviet book market It delivers a profound and critical exploration of Russian visual imaginary of classic popular and contemporary prose Among all the carelessly bungled covers of mass published post Soviet series the study identifies gems from experimental designers By taking a comparative approach to the clash of two formerly separate book cultures the Western and the Soviet that results both in a mixture of highbrow and lowbrow forms and in ideological re interpretations of the literary works this book contributes to opening an East West dialogue between the fields of Russian studies contemporary book and media history art design and visual studies **The Russian Navy** Defense Dept., Navy,

Tsukasa Aso, Christoph Rademacher, Jonathan Dobinson, 2022-04-22 For the first time this book provides an up to date history

of product design and product design law covering 17 countries Japan Korea China Singapore the United Kingdom Germany France Italy the Nordic countries Denmark Finland Iceland Norway and Sweden Russia the United States Brazil and Australia selected for their innovative or influential approach to design or design protection Each country is the subject of two chapters one on the history of design and the other on the history of design law authored by experts in design and intellectual property IP law This unique interdisciplinary approach explains why and how various national design protection systems that can include design copyright trade mark competition and civil laws developed making it an ideal book for students researchers and lawyers The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages and so is also recommended for policy and law makers as well as organizations that administer IP rights Topics include the subject matter of design protection procedural and substantive requirements design registration infringement and the overlap of design rights and other IP rights The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements key designers and iconic designs and the current state of design The chapters highlight the connected and often complementary relationship between the two histories not only for each country but at the regional and international level often as a result of government policies trade colonialism immigration and globalisation Design and design practice continue to become more global and evolve with developments in technology At the same time design laws are not internationally harmonized and continue to develop at the national level with a number of significant changes occurring in recent years This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it

Development Appropriations for 2003: Department of Energy ... National Nuclear Security Administration ... Power Marketing Administrations United States. Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development, 2002 107-2 Hearings: Energy and Water Development Appropriations For 2003, Part 4, 2002, *, 2002 **Energy and Water Development Appropriations for 2003** United States. Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development, 2002 **Defence from the Skies: 80 Years of the Indian Air Force**, 2013-08-15 Indian Air Force now completes 80 years since it was formed as an independent component of India's armed forces. Time and again the air force has performed magnificently even against severe odds and built up a professional reputation that is the envy of leading air forces of the world. This volume as the Second Edition of the earlier volume published in 2007 has been extensively revised and updated. Air Forces are unique in the sense that they are the only national military institution exclusively devoted to military operations in the aerospace continuum. The Indian Air Force is no different. But their dominant role in modern warfare, the high costs of aerospace power and a host of other factors demand closer attention to their role in modern defence and the protection of national interests. Air Forces don't win wars by themselves and no one in the Indian Air Force has ever claimed it. But no war can be won without them. We learnt that seminal lesson the hard way when we did not use the potent force of the IAF's combat fleet in the Sino-Indian War of 1962. It is from this perspective that this study or rather an interpretative essay reflecting on the significant issues and events of the past 80 years approaches the challenges the Indian Air Force faces in the coming decades. IAF combat force levels have slumped while its commitments are rapidly growing in consonance with our expanding economic and political interests well beyond our territorial boundaries. Transnational Corporations and Local Innovation Jose Cassiolato, Graziela Zucoloto, Dinesh Abrol, Xieliu Liu, 2020-11-29 This series of books brings together results of an intensive research programme on aspects of the national systems of innovation (NSI) in the five BRICS countries: Brazil, Russia, India, China and South Africa. It provides a comprehensive and comparative examination of the challenges and opportunities faced by these dynamic and emerging economies. In discussing the impact of innovation with respect to economic, geopolitical, socio-cultural, institutional and technological systems, it reveals the possibilities of new development paradigms for equitable and sustainable growth. This volume explores the relationship between transnational corporations (TNCs) and NSI across BRICS economies. The essays highlight the role of foreign direct investment (FDI), the evolution of TNCs and examine local factors such as government policies, human resources, market structures and technological capabilities that affect collaborative efforts with indigenous firms towards innovation and development. The authors approach the thesis of technological globalisation with some caution, refuting the idea that research and development (R & D) activities have been inexorably internationalised. Original and detailed data together with expert analyses on wide-ranging issues make this book an invaluable resource for researchers and scholars in economics, development studies and political science, in addition to policy makers and development practitioners.
