Russian Military Power:

Russia's Military Way to the West Christopher Duffy, 2015-10-05 This book provides an historical perspective on the growth of Russian military power studying the emergence of the Russian regular army from 1700 until the end of the eighteenth century In the process he evaluates the relative importance of Western and native influences on the creation of this formidable military machine and indicates the ways in which Russian power was projected in the West The book includes general discussions of the Russian soldier the Russian officer and the rapacious Cossacks and concludes by identifying certain important continuities between the Russian past and present

The Russian Military in the 21st Century Aleksei Arbatov, 1997 The very title of this monograph is quite ambiguous On the one hand only 3 years are left until the 21st century This is too short a time to forecast or propose any serious change in a huge and complicated organization like the armed forces of a great power On the other hand each century lasts 100 years and without a crystal ball it is impossible to predict the evolution of armed forces over such a long period least of all at a time of dynamic and revolutionary shifts in the world s technologies economics the geopolitical scene and the relative military balance between nations Hence in addressing the prospects for Russia s armed forces it seems realistic to discuss the future some 10 15 years ahead to 2010 This is an appropriate timeframe for the fulfillment of large cycles of economic and military development in Russia and in other major states It allows consideration of the possible realignment of principal international coalitions and it provides time to implement major weapons programs Accordingly with a timeframe of 10 15 years future trends are sufficiently imbedded in present reality to be discussed without entering the world of science fiction Present policy choices may tangibly affect developments in 10 15 years Besides as presently being considered the Russian military reform initiative is planned to proceed through its first two stages through the year 2005 What happens in that process will define how the Russian military proceeds from 2005 through 2010 the third stage of the reform initiative Within this temporal framework the following monograph discusses Russia s military alternatives appropriate to its new security requirements projected economic conditions technological capabilities and possible changes in the international situation which might affect Russia and its relationship with other major powers Even at that many issues relevant to the subject like industrial and financial projections problems of defense conversion possible advances in military technology demographic considerations the draft and mobilization have to be left out or discussed only superficially All of these issues are part of the comprehensive notion of military reform something larger than the narrow notion of reforming the armed forces In this monograph based strictly on unclassified sources the latter topic will be the subject of analysis

The Russian Military Steven E. Miller, Dmitri Trenin, 2004-08-27 Russian military capacity remains a major consideration for global security even in the post Soviet era This book assesses today s Russian military and analyzes its possible future direction The contributors experts on the subject from both Russia and the West consider not only how Russia has built its military capacity but also the policies and doctrines

that have shaped Russia's defense posture. They discuss such topics as the downsizing of the Russian military, Russia's use of military power in regional conflicts and the management of Russia's nuclear weapons. For more than a decade, Russian leaders have struggled to formulate security and defense policies that protect Russia's borders and project Russia's influence. The contributors to *The Russian Military* find that the choices Russian leaders have made have been significantly influenced by the military reforms Russia has attempted to implement since the collapse of the Soviet Union. The protracted and intense debate over military reform has been and will continue to be decisive in shaping Russian military capacity.

Russian Energy Policy and Military Power Pavel K. Baev, 2012-12-06. This book examines the interplay between energy policy and security policy under Vladimir Putin and his drive to re-establish Russia's greatness. Assessing the internal contradictions of this policy, the book argues that Russia's desire to strengthen its role of energy security provider is undermined by its inability to secure growth in production of oil and gas. Further, the pressing demand to channel more resources into the military industrial complex clashes with the growing need to invest in the energy complex and the priority granted to strategic forces deprives the conventional forces of strike power and strategic mobility. In conclusion, the author anticipates how these contradictions could be resolved and suggests three short scenarios for Russia's continuing transition in the next decade. This book will be of interest to students of Russian politics, European politics and international security.

Russia's Military Revival Bettina Renz, 2018-04-27. Russian annexation of Crimea and the subsequent air campaign over Syria took the world by surprise. The capabilities and efficiency of Moscow's armed forces during both operations signalled to the world that Russia was back in business as a significant military actor on the international stage. In this cutting edge study, Bettina Renz provides an in-depth and comprehensive analysis of Russia's military revival under Putin's leadership. Whilst the West must adjust to the reality of a modernised and increasingly powerful Russian military, she argues that the renaissance of Russian military might and its implications for the balance of global power can only be fully understood within a wider historical context. Assessing developments in Russian Great Power thinking, military capabilities, Russian strategic thought and views on the use of force throughout the post-Soviet era, the book shows that rather than signifying a sudden Russian military resurgence, recent developments are consistent with longstanding trends in Russian military strategy and foreign policy.

The Evolution of Military Power in the West and Asia Pauline Eadie, Wyn Rees, 2015-09-16. This book investigates how states in both the West and Asia have responded to multi-dimensional security challenges since the end of the Cold War, focusing on military transformation. Looking at a cross-section of different countries, this volume assesses how their armed forces have responded to a changing international security context. The book investigates two main themes. First, how the process of military transformation in terms of technological advances and new ways of conducting warfare has impacted on the militaries of various countries. These technologies are hugely expensive and the extent to which different states can afford them and the ability of these states to utilise these technologies differs greatly. Second, the volume investigates the social

dimensions of military transformation It reveals the expanding breadth of tasks that contemporary armed forces have been required to address This includes the need for military forces to work with other actors such as non governmental agencies and humanitarian organisations and the ability of armed forces to fight asymmetric opponents and conduct post conflict reconstruction tasks The conflicts in Iraq and Afghanistan exemplified how important the relationship between technological and social transformation has become This book will be of much interest to students of strategic studies military innovation Asian politics security studies and International Relations

The Russian Armed Forces at the Dawn of the Millennium, 2000 This anthology is an outgrowth of a conference titled The Russian Armed Forces at the Dawn of the Millennium held at the Collins Center of the Army War College s Center for Strategic Leadership from 7 through 9 February 2000 The genesis for the conference was the realization by several members of the staff of the Collins Center and Army War College faculty that the U S led NATO operation in Kosovo resulted in a significant shift of Russian views on the United States and NATO The conference also complemented our general objective of examining the changing environment in which the United States including its armed forces finds itself The conference brought together over 50 individuals from academia and the policy and intelligence communities to examine the current state of the Russian military Focusing primarily on the socio political dimension of the military but not ignoring the military technical dimension the presentations delivered during the conference looked at Russia s domestic environment the state of the military perceived threats and Russia s capacity to generate responses to those threats DTIC web site

Russia and Postmodern Deterrence Stephen J. Cimbala, Peter Jacob Rainow, 2007 Russia is a post communist country struggling to adapt to the modern world economically and politically In the twenty first century Russia faces postmodern social cultural and political problems with its old policy of deterrence For Russia's political leaders and military planners three scenarios define their postmodern setting 1 the world's leading military and economic powers with the exception of China are market based economies and political democracies 2 the revolution in military affairs based on advances in information electronics and communications is driving both civil and military technology innovation and 3 the Cold War's fundamental war fighting premises such as deterrence based on nuclear weapons and on conventional armed forces organized and trained for massive wars of attrition have changed radically These points implications for future Russian strategy are profound Stephen J Cimbala and Peter Rainow argue Russia faces an increased presence of its former adversary the United States in adjacent territories an increasingly assertive NATO which includes many of Moscow's former allies and continued fighting in Chechnya Ominously China aspires to overtake Russia as the world's second ranked military power and establish its hegemony over the Pacific basin In short Russia confronts a radically new political and military world order that demands

adapting to postmodern thinking about deterrence and defense The danger is that Russia realizing that it lags behind in leveraging modern technology for military purposes and that it must scrap its dependence on conscription now relies on nuclear weapons as its first line of deterrence against either nuclear or conventional attack The Transformation of Russia's Armed Forces Roger N. McDermott, 2016-03-17 At no time since the end of the Cold War has interest been higher in Russian security issues and the role played in this by the modernization of Russia's Armed Forces The continued transformation of its Armed Forces from Cold War legacy towards a modern combat capable force presents many challenges for the Kremlin Moscow's security concerns domestically in the turbulent North Caucasus and internationally linked to the Arab Spring as well as its complex relations with the US and NATO and its role in the aftermath of the Maidan Revolution in Ukraine in 2014 further raises the need to present an informed analytical survey of the country's military past present and future This collection addresses precisely the nature of the challenges facing Russian policymakers as they struggle to rebuild combat capable military to protect Russian interests in the twenty first century This book was based on a special issue of the Journal of Slavic Military Studies
