Russian Word Formation ... Translated by B.S. Johnson. Edited by J.E.S. Cooper Nikolai Maksimovich SHANSKY, Joshua Edward Synge COOPER, Bernard Johnson, 1968 Categories of Word Formation and Borrowing Renáta Panocová, 2015-09-04 This book presents the onomasiological approach to word formation and applies it to neoclassical formations using data taken from English and Russian medical terminology The phenomenon of neoclassical formations is challenging for morphological theory because it raises questions about determining its boundaries as a distinct category The difficulties of differentiating between compounding and affixation between blending and compounding and between word formation and borrowing represent key problematic areas here The basic underlying hypothesis considered in this book is that the position of neoclassical formations in English and Russian is different It will be argued that whereas in English neoclassical word formation is a system of word formation Russian has only individual borrowings This hypothesis and the theoretical problems it entails are viewed from the perspective of Štekauer's onomasiological theory of word formation Štekauer's theory takes the needs of the speech community as its starting point in explaining word formation In this theory the different analyses of neoclassical formations in English and Russian can be accounted for in an intuitively appealing and theoretically elegant way As naming needs are central word formation and borrowing can be analysed as alternative responses activating different components of the language system

been included in morphology. However, this book focuses on their mutual influence and interaction.
