Rüstung und Wirtschaft Gerhard Brandt, 1964

Cowen, 2021-11-18 First published in 1986 Based on the theme that defense procurement serves as an instrument of alliance and domestic politics this book provides the first comprehensive analysis of post war West German approaches to and experience with procurement strategies Dr Cowen explores how successive German governments have used military procurement to facilitate the rehabilitation of the new West German state and later to consolidate the German position within the alliance The author shows that by the mid 1970s the Federal Republic had succeeded in its procurement policy acting as a serious partner for defense projects in Europe and building a flourishing defense industry The book s final chapters describe the structural tensions between competing procurement objectives that have recently emerged The FRG must decide whether to continue to maintain a whole range of defense industrial capacities or to specialize nationally and purchase other necessary commodities in the United States According to the author national specialization is not seriously considered by the German government Such a step the author suggests would diminish Germany s role in the alliance and jeopardize one of its foremost foreign policy goals equality with Great Britain and France

Hitler Peter Longerich, 2019 From one of the most prominent biographers of the Nazi period a new and provocative portrait of the figure behind the century s worst crimes Acclaimed historian Peter Longerich author of Goebbels and Heinrich Himmler now turns his attention to Adolf Hitler in this new biography While many previous portraits have speculated about Hitler s formative years Longerich focuses on his central role as the driving force of Nazism itself You cannot separate the man from the monstrous movement he came to embody From his ascendance through the party s ranks to his final hours as Führer in April 1945 Longerich shows just how ruthless Hitler was in his path to power He emphasizes Hitler s political skills as Germany gained prominence on the world s stage Hitler s rise to and

ultimate hold on power was more than merely a matter of charisma rather it was due to his ability to control the structure he created His was an image constructed by his regime an essential piece self created of propaganda This comprehensive biography is the culmination of Longerich s life long pursuit to understand the man behind the century s worst crimes

Modernizing Bavaria Mark Milosch, 2006-03-01 In 1949 Bavaria was not only the largest and best known but also the poorest most agricultural and most industrially backward region of Germany It was further its most politically conservative region The largest political party in Bavaria was the Christian Social Union CSU an extremely conservative even reactionary regional party In the ensuing twenty years the leaders of the CSU s small liberal wing in particular Franz Josef Strauss long time party chair and the most colorful and polarizing politician in postwar Germany broke with the anti industrial traditions of Bavarian Catholic politics and made themselves useful to industry With tactical brilliance the politicians pursued their individual political ambitions rather than a coherent modernization strategy which by 1969 had turned Bavaria into a prosperous Land the center of Germany s new aerospace defense and energy industries with a disproportionate share of its research institutes
