Native Americans on Network TV Michael Ray FitzGerald, 2013-12-24 The American Indian has figured prominently in many films and television shows portrayed variously as a villain subservient friend or a hapless victim of progress Many Indian stereotypes that were derived from European colonial discourse some hundreds of years old still exist in the media today Even when set in the contemporary era novels films and programs tend to purvey rehashed tropes such as Pocahontas or man Friday In *Native Americans on Network TV Stereotypes Myths and the Good Indian* Michael Ray FitzGerald argues that the colonial power of the U S is clearly evident in network television s portrayals of Native Americans FitzGerald contends that these representations fit neatly into existing conceptions of colonial discourse and that their messages about the Good Indian have become part of viewers understandings of Native Americans In this study FitzGerald offers close examinations of such series as *The Lone Ranger* *Daniel Boone* *Broken Arrow* *Hawk* *Nakia* and *Walker Texas Ranger* By examining the traditional role of stereotypes and their functions in the rhetoric of colonialism the volume ultimately offers a critical analysis of images of the Good Indian minority figures that enforce the dominant group s norms A long overdue discussion of this issue *Native Americans on Network TV* will be of interest to scholars of television and media studies but also those of Native American studies subaltern studies and media history

Democratic Destiny and the District of Columbia Ronald W. Walters, Toni-Michelle Travis, 2010-03-01 This book contributes substantially to urban affairs and public policy literature by presenting an introduction to the complex politics and public policy issues of Washington D C The uniqueness of the city as elaborated in this volume provides background for understanding the non traditional congressional relationship with the city and the way in which this establishes and perpetuates the continuing fight for congressional representation real home rule and equitable federal benefits for citizens of the District of Columbia Usually

becoming a mayor member of a city council or agency head in a major city could become a stepping stone to higher office In Washington D C however this has not been the case Contests for political leadership operate in a unique political climate because Washington D C is the capital of the U S subject to congressional oversight has a majority African American population and has a majority Democratic population Those who become mayor are therefore confined to play a local with rare opportunities for a national role One Objective of this volume is to highlight the difficulties of experiencing political democracy and adequate policy distribution by citizens of the District of Columbia These analyses conclude that one of the major obstacles to these objectives is the manner in which home rule was constructed and persists leading to the conclusion that the desire of citizens and their leaders for change is well founded

An Analysis of Thinking and Research About Qualitative Methods W. James Potter, 2013-11-05 Written for social science scholars who want to learn more about the qualitative way of thinking this book addresses the full continuum of issues about the qualitative methodologies At one end of that continuum are the deeply philosophical concerns of ontology and epistemology At the other concrete end of that continuum are the practical issues of what is considered evidence How does one go about gathering evidence Where when and how does one analyze evidence What are the alternative ways of dealing with tone and voice in writing qualitative research The attention to practical concrete issues makes this book useful as a handbook providing a great deal of vital information to scholars who want a guide to making decisions as they navigate their research questions through the qualitative realm Uniquely qualified to write such a book Potter has earned PhDs in both qualitative methods with a concentration in linguistics and field studies and in quantitative methods with a concentration in social science theory and statistics The book is not an ideological argument that glorifies one system of thinking while attempting to persuade the reader that other systems of thinking are bankrupt Rather the book presents a respectful balanced analysis of the strengths and weaknesses of the qualitative approach The book builds to a controversial final chapter entitled Is Convergence a Possibility in which Potter synthesizes a conclusion from his analysis of a wide range of qualitative studies across three broad topic areas text focused research audience focused research and institution focused research and across seven major qualitative methodologies ethnography ethnomethodology reception study ecological psychology symbolic interactionism cultural studies and textual analysis His conclusion is that not only is there a possibility of a convergence between qualitative and quantitative approaches but that the convergence has already happened The book includes an appendix in which 95 books and articles using the qualitative approach are abstracted and analyzed to illustrate key points of methodology and methods It also includes subject and author indexes

Dead Men's Propaganda Terhi Rantanen, 2024-05-07 In Dead Men's Propaganda Ideology and Utopia in Comparative Communications Studies Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to understanding the 21st century's challenges of

war and rival streams of propaganda Borrowing her conceptual lenses from Karl Mannheim and Robert Merton Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy illuminating the work of pioneers in the field Some of these were well known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press* Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migr scholars notably Paul Kecskemeti and Nathan Leites Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century this book challenges orthodoxies in the intellectual histories of communication studies
