**The Keys to Bread and Wine** Abigail Agresta, 2022-07-15 How did medieval people think about the environments in which they lived In a world shaped by God how did they treat environments marked by religious difference The Keys to Bread and Wine explores the answers to these questions in Valencia in the later Middle Ages When Christians conquered the city in 1238 it was already one of the richest agricultural areas in the Mediterranean thanks to a network of irrigation canals constructed under Muslim rule Despite this constructed environment drought flooding plagues and other natural disasters continued to confront civic leaders in the later medieval period Abigail Agresta argues that the city's Christian rulers took a technocratic approach to environmental challenges in the fourteenth century but by the mid fifteenth century relied increasingly on religious ritual reflecting a dramatic transformation in the city's religious identity Using the records of Valencia's municipal council she traces the council's efforts to expand the region's infrastructure in response to natural disasters while simultaneously rendering the landscape within the city walls more visibly Christian This having been achieved Valencia's leaders began by the mid fifteenth century to privilege rogations and other ritual responses over infrastructure projects But these appeals to divine aid were less about desperation than confidence in the city's Christianity Reversing traditional narratives of technological progress The Keys to Bread and Wine shows how religious concerns shaped the governance of the environment with far reaching implications for the environmental and religious history of medieval Iberia

Leone, Shanna Lino, 2023-10-02 Chronicling sixteenth century Spain to the present day Beyond Human aims to decentre the human and acknowledge the material historicity of more than human nature The book explores key questions relating to ecological equity justice and responsibility within and beyond Spain in the Anthropocene Examining relations between Iberian cultural practices historical developments and ecological processes Maryanne L Leone Shanna Lino and the contributors to this volume reveal the structures that uphold and dismantle the non human human dichotomy and nature culture divide The book critiques works from the Golden Age to the twenty first century in a wide range of genres including comedia royal treatises agricultural reports paintings satirical essays horror fiction and film young adult and speculative literature poetry graphic novels and television series The authors contend that Spanish cultural studies must expose the material historicity that entangles today's ecological crises and ecosocial injustices with previous future and contemporary

entities The book argues that this will require the simultaneous decentring of the human and of the Anthropocene as an ecocritical framework By standardizing ecosocial analysis and widening avenues for ecopedagogical approaches Beyond Human participates in the ecocentric transformation of Hispanic cultural studies      **Fire and Water Engineering** ,1925
