whose real name is Albert discovers his astrology charts purpose when he discovers the ancient astrology and anthology occult book as an astronomer and scientist after he retires from the chief of police position His best friend Archangel Ariel is on Earth to carry out Gods duties and responsibilities by stopping the bad spirits coming to Earth and taking over the newfound planeta flying planet when their other friend Mr Coldwater and his hoard of cats begin to act suspicious Granddad Albert and Flight Boss Archangel Ariel decide Mr Coldwater cant be trusted The bad spirits fail to use Mr Coldwater and his devoted cats as a body vessel on Earth for long as they fight off the bad spirits with their unconditional love frequencies Eventually as the love and vibration frequencies take over the dark spirits and as darkness cannot attack light the bad spirits had to find another way to possess the planet Earth They knew the highly intelligent humans even the cats and animals proved too hard to possess by the bad spirits They eventually found their way into planet Earths realm of reality in the form of an object the robots frequencies and vibrations that the humans thought they were creating But it was a way for the robots possessed by bad spirits to take over Earth and create their own power and race This is where Mr Coldwater really comes through for his friends Flight Boss and Granddad Albert Mr Coldwater knows whats going on and hes the only one that knows how to stop his artificial solar system created by himself as a scientist to sustain Earth once the sun died It was the only way to stop the robots from getting access in and attack the Butterfly Heaven planet where Flight Boss lives and the possessed robots wanted to expand and take over many other planets and the human beings Another book by the author is Life in Retrograde

Fatal Civil Aircraft Accidents Peter J. Stevens, 2014-05-12 Fatal Civil Aircraft Accidents Their Medical and Pathological Investigation focuses on relevant literature and discussions of the impact of medical and pathological investigation on fatal flying accidents The publication first elaborates on public transport accidents natural disease in the operating crew impaired efficiency of a pilot due to intoxication and non medical cause for an accident Topics include carbon monoxide intoxication drugs natural disease as a contributory cause for an accident and natural disease as the primary cause for an accident The book then takes a look at pathological evidence of events prior to an accident reconstruction of events at impact and immediately after an accident and natural disease in the pilots The book ponders on glider accidents natural disease in glider pilots reconstruction of events during an accident survival and safety equipment and medical standards for glider pilots The manuscript also examines fatal airliner accident as an example of mass disaster official bodies and groups concerned with the investigation of an accident identification of the bodies of the dead and certification of death and disposal of the deceased The text is a valuable source of data for researchers interested in the medical and pathological investigation of aircraft accidents

Aviation Security Management Andrew R. Thomas, 2008-10-30 Because of 9 11 there is universal recognition that aviation security is a deadly serious business Still around the world today the practice of aviation security is rooted in a hodgepodge of governmental rules industry traditions and local idiosyncrasies In fact nearly seven years after the largest single attack involving the air transport industry there

remains no viable framework in place to lift aviation security practice out of the mishmash that currently exists. It is the ambitious intent of Aviation Security Management to change that. The goals of this set are nothing less than to make flying safer, to make transporting goods by air safer, and to lay the foundation for the professionalization of this most important field. This dynamic set showcases the most current trends, issues, ideas, and practices in aviation security management, especially as the field evolves in the context of globalization and advances in technology. Written by leading academic thinkers, practitioners, and former and current regulators in the field, the three volumes highlight emerging and innovative practices, illustrated with examples from around the world. Volume 1 takes a penetrating look at the overall framework in which aviation security management has taken place in the past and will likely do so in the foreseeable future. It covers the major areas of focus for anyone in the aviation security business and it provides a basis for educational programs. Volume 2 delves into the emerging issues affecting aviation security managers right now. Volume 3, Perspectives on Aviation Security Management, covers the full spectrum of international aviation security-related issues. It will serve as part of the foundation for the next generation of research in the area in both a business and cultural context. Collectively, these volumes represent the state of the art in the field today and constitute an essential resource for anyone practicing, studying, teaching, or researching aviation security management.
