Sacred Cows At The Public Trough:

Sacred Cows at the Public Trough Denzel Ferguson, Nancy Ferguson, 1983 **Sacred Cows at the Public Trough** Denzel Ferguson, Nancy Ferguson, 1983 **Outback and Out West** Tom Lynch, 2022-11 Outback and Out West examines the ecological consequences of a settler colonial imaginary by comparing expressions of settler colonialism in the literature of the American West and Australian Outback Tom Lynch traces exogenous domination in both regions which resulted in many similar means of settlement including pastoralism homestead acts afforestation efforts and bioregional efforts at belonging Lynch pairs the two nations texts to show how an analysis at the intersection of ecocriticism and settler colonialism requires a new canon that is responsive to the social cultural and ecological difficulties created by settlement in the West and Outback Outback and Out West draws out the regional Anthropocene dimensions of settler colonialism considering such pressing environmental problems as habitat loss groundwater depletion and mass extinctions Lynch studies the implications of our settlement heritage on history art and the environment through the cross national comparison of spaces He asserts that bringing an ecocritical awareness to settler colonial theory is essential for reconciliation with dispossessed Indigenous populations as well as reparations for ecological damages as we work to decolonize engagement with and literature about these places **Where Land and Water Meet** Nancy Langston, 2009-11-23 Water and land interrelate in surprising and ambiguous ways and riparian zones where land and water meet have effects far outside their boundaries Using the Malheur Basin in southeastern Oregon as a case study this intriguing and nuanced book explores the ways people have envisioned boundaries between water and land the ways they have altered these places and the often unintended results The Malheur Basin once home to the largest cattle empires in the world experienced unintended widespread environmental degradation in the late nineteenth and early twentieth centuries After establishment in 1908 of Malheur National Wildlife Refuge as a protected breeding ground for migratory birds and its expansion in the 1930s and 1940s the area experienced equally extreme intended modifications aimed at restoring riparian habitat Refuge managers ditched wetlands channelized rivers applied Agent Orange and rotenone to waterways killed beaver and cut down willows Where Land and Water Meet examines the reasoning behind and effects of these interventions gleaned lessons from their successes and failures Although remote and specific the Malheur Basin has myriad ecological and political connections to much larger places This detailed look at one tangled history of riparian restoration shows how through appreciation of the complexity of environmental and social influences on land use and through effective handling of conflict people can learn to practice a style of pragmatic adaptive resource management that avoids rigid adherence to single agendas and fosters improved relationships with the land Kill the Cowboy Sharman Apt Russell, 2001-01-01 Argues that the mythology of the cowboy should be replaced by new icons reflecting the realities of the modern West including water shortages overgrazing and the need to protect western wildlife and wilderness Prairie Dog Empire Paul A. Johnsgard, 2005-01-01 For hundreds

of years black tailed prairie dogs inhabited the Great Plains by the millions improving the grazing for bison and pronghorn antelope digging escape holes and homes for burrowing owls and rodents and serving as prey for badgers coyotes hawks and bobcats This book by the renowned naturalist and writer Paul A Johnsgard tells the complex biological and environmental story of the western Great Plains under the prairie dog s reign and then under a brief but devastating century of human dominion An indispensable and highly readable introduction to the ecosystem of the shortgrass prairie Prairie Dog Empire describes in clear and detailed terms the habitat and habits of black tailed prairie dogs their subsistence seasonal behavior and the makeup of their vast colonies and the ways in which their towns transform the surrounding terrain for better or worse Johnsgard recounts how this terrain was in turn transformed over the past century by the destruction of prairie dogs and their grassland habitats together with the removal of the bison and their replacement with domestic livestock A disturbing look at profound ecological alterations in the environment this book also offers a rare and invaluable close up view of the rich history and threatened future of the creature once considered the keystone species of the western plains Included are maps drawings and listings of more than two hundred natural grassland preserves where many of the region s native plants and animals may still be seen and studied

This Land is My Land James R. Skillen, 2020-08-10 Among American conservatives the right to own property free from the meddling hand of the state is one of the most sacred rights of all But in the American West the federal government owns and oversees vast patches of land complicating the narrative of western individualism and private property rights As a consequence anti federal government sentiment has animated conservative politics in the West for decades upon decades In *This Land Is My Land* James R Skillen tells the story of conservative rebellion ranging from legal action to armed confrontations against federal land management in the American West over the last forty years He traces the successive waves of conservative insurgency against federal land authority the Sagebrush Rebellion 1979 1982 the War for the West 1991 2000 and the Patriot Rebellion 2009 2016 and shows how they evolved from regional revolts waged by westerners with material interests in federal lands to a national rebellion against the federal administrative state Cumulatively Skillen explains how ranchers miners and other traditional users of federal lands became powerful symbols of conservative America and inseparably linked to issues of property rights gun rights and religious expression Not just a book about property rights battles over Western lands *This Land is My Land* reveals how the evolving land based conflicts in the West since the 1980s reshaped the conservative coalition in America a development that ultimately helped lead to the election of President Donald J Trump in 2016

[Shadowlands](#) Anthony McCann, 2019-07-02 Los Angeles Times Bestseller An epic exploration of the 2016 right wing Oregon Occupation an excellent microcosm by which we might better understand our difficult national history and distressing political moment Maggie Nelson In 2016 a group of armed divinely inspired right wing protestors led by Ammon Bundy occupied the Malheur National Wildlife Refuge in the high desert of eastern Oregon Encamped in the shadowlands of the republic insisting that the Federal government had no

right to own public land the occupiers were seen by a divided country as either dangerous extremists dressed up as cowboys or as heroes insisting on restoring the rule of the Constitution From the Occupation s beginnings to the trials of the occupiers in federal court in downtown Portland and their tumultuous aftermaths Shadowlands is the resonant multifaceted story of one of the most dramatic flashpoints in the year that gave us Donald Trump Sharing the expansive stage with the occupiers are a host of others Native American tribal leaders public lands ranchers militia members environmentalists federal defense attorneys and Black Lives Matter activists each contending in their different ways with the meaning of the American promise of Liberty Gathering into its vortex the realities of social media technology history religion race and the environment this piercing work by Anthony McCann offers us a combination of beautiful writing and high stakes analysis of our current cultural and political moment Shadowlands is a clarifying exhilarating story of a nation facing an uncertain future and a murky past in a time of great collective reckoning

The Science of Open Spaces Charles G. Curtin,2015-07-23 Since the days of the American Frontier our management policies have promoted a one size fits all mentality for large complex landscapes Landscape ecologist Charles Curtin argues that instead we need a science based approach that accounts for the dynamic nature of complex systems and gives local stakeholders a say in their futures The Science of Open Spaces proposes that we return to first principles fundamental physical laws of the universe and think about complex systems from the ground up based on modern scientific theory backed up by practical experience Curtin walks us through foundational concepts of thermodynamics ecology sociology and resilience theory applying them to real world examples from years he has spent designing large scale place based collaborative research programs in the United States and around the world Geography

Inside Out Richard Symanski,2002-06-01 Taking sharp aim at complacent geography scholars this irreverent book turns the world of academic geography upside down The author a foremost figure in the field joins forces with his alter ego the incorrigible Korski to draw fire from his own personal and professional experience No one knows better than they the stuffy censorship and skewed logic that inform the geography establishment and stifle the valiant geographer and they tell all With an unsparing eye Geography Inside Out exposes a discipline soiled by cerebral litter and shamed by intellectual cowardice Symanski shows no mercy for the pompous the mediocre or the hypocritical And he reveals the devastating truth about a geographer blackballed for life for writing about prostitution and for his intellectual attack of a major figure within the discipline A shrewd look at high profile geographers this book sheds light on how geographers write and think It also helps explain why geography has long been seen as the poor and neglected sister of the social sciences Unprecedented in subject and scope Geography Inside Out is certain to be as controversial as it is edifying **Mojave Lands** Elisabeth M.

Hamin,2003 Introducing the concept of interpretive planning a method that takes into account conflicting views of all interested parties she offers explicit steps for the planner and policy analyst to use This book will appeal to scholars and students in environmental studies planning and landscape architecture and history as well as professionals in planning

resource management the National Park Service and related conservation organizations public and private BOOK JACKET

Confessions of an Eco-Warrior Dave Foreman,2016-07-20 A book that will set the course for the environmental movement for years to come Confessions of an Eco Warrior is an inspiring ecological call to arms by America s foremost and most controversial environmental activist Rude and brilliant Read it and you will see the future William Kittredge

Compromising Democracy Harold Shepherd,2007 Few authors have covered the impact on federal rangelands of the political right s attempt to reverse the influence of the environmental laws passed in the 70s and 80s and the GOP s assault on federal courts and plaintiff s attorneys Shepherd illustrates the critical role of federal courts not only in the protection of public lands and how the Bush administration has set about dismantling this court system as part of its attack on activist judges and plaintiff s lawyers but the fundamental principles of democracy Final Environmental Impact Statement for the Land and Resource Management Plans, 2001 Revisions ,2001 *Selected References Concerning the USDA Forest Service* ,1995

Walking the High Desert Ellen Waterston,2020-06-22 Former high desert rancher Ellen Waterston writes of a wild essentially roadless starkly beautiful part of the American West Following the recently created 750 mile Oregon Desert Trail she embarks on a creative and inquisitive exploration introducing readers to a trusting na ve earnest stubbly grumpy old man of a desert that is grappling with issues at the forefront of national if not global concern public land use grazing rights for livestock protection of sacred Indigenous ground water rights and protection of habitat for endangered species Blending travel writing with memoir and history Waterston profiles a wide range of people who call the high desert home and offers fresh perspectives on nationally reported regional conflicts such as the Malheur Wildlife Refuge occupation Walking the High Desert invites readers wherever they may be to consider their own beliefs identities and surroundings through the optic of the high desert of southeastern Oregon

Social Work Ethics Eileen Gambrill,2017-05-15 This collection of essays highlights ethical issues in social work which are often overlooked as well as recurring clashes that influence how they play out for example among different values and related moral judgements A wide range of ethical issues are addressed such as the types of technologies incorporated into social work issues raised by the common position of social workers as double agents required to carry out state mandates while also honoring obligations to clients and issues concerning the distribution of scarce resources These topics are integrally related to other often neglected concerns such as harming in the name of helping the ethics of claims making regarding what is true and what is not and related concerns regarding empowerment and social justice This collection which includes essays from an array of professions and disciplines is designed to bring these neglected topics to the attention of readers and to offer suggestions for addressing them in a manner that is faithful to obligations described in social work codes of ethics

Wild Rangelands Johan T. du Toit,Richard Kock,James Deutsch,2012-11-06 Rangeland ecosystems which include unimproved grasslands shrublands savannas and semi deserts support half of theworld s livestock while also providing habitats for some ofthe most charismatic of wildlife species This

book examines the pressures on rangeland ecosystems worldwide from human land use over hunting and subsistence and commercial farming of livestock and crops. Leading experts have pooled their experiences from all continents to cover the ecological, sociological, political, veterinary, and economic aspects of rangeland management today. This book provides practitioners and students of rangeland management and wildland conservation with a diversity of perspectives on a central question: can rangelands be wildlands? The first book to examine rangelands from a conservation perspective, it emphasizes the balance between the needs of people and livestock and wildlife. Written by an international team of experts covering all geographical regions, it examines ecological, sociological, political, veterinary, and economic aspects of rangeland management and wildland conservation, providing a diversity of perspectives not seen before in a single volume.

A Conspiracy of Optimism Paul W. Hirt, 1996-01-01. A Conspiracy of Optimism explains the controversy now raging over the U.S. Forest Service's management of America's national forests. Confronted with the dual mandate of production and preservation, the U.S. Forest Service decided it could achieve both goals through more intensive management. For a few decades after World War Two, this conspiracy of optimism masked the fact that high levels of resource extraction were destroying forest ecosystems. The effects of intensive management—massive clear cuts, polluted streams, declining wildlife populations, and marred scenery—initiated several decades of environmental conflict that continues to the present. Hirt documents the roots of this conflict and illuminates recent changes in administration and policy that suggest a hopeful future for federal lands.
