Tipping Sacred Cows Betsy Chasse, 2014-01-21 In this everyday guide Betsy Chasse movie producer blogger radio show host and pioneer behind the cult sleeper hit *What the Bleep Do We Know* suggests how you can tip over your sacred cows of belief dump your personal prejudices and biases and begin to rebuild a spiritual lifestyle that really works *Sacred Cows Make the Best Burgers* Robert J. Kriegel, David Brandt, 2008-11-15 Sacred cows outdated and costly business practices such as the reports that are never read or a slow down of innovative ideas exist in every company Inspired by insights gained from more than 450 programs conducted with all types of organizations the authors of SACRED COWS MAKE THE BEST BURGERS show how corporations can kill off the sacred cows that are crippling them *The Agrarian Vision* Paul Thompson, 2010-07-30 As industry and technology proliferate in modern society sustainability has jumped to the forefront of contemporary political and environmental discussions The balance between progress and the earth's ability to provide for its inhabitants grows increasingly precarious as we attempt to achieve sustainable development In *The Agrarian Vision* Sustainability and Environmental Ethics Paul B Thompson articulates a new agrarian philosophy emphasizing the vital role of agrarianism in modern agricultural practices Thompson a highly regarded voice in environmental philosophy unites concepts of agrarian philosophy political theory and environmental ethics to illustrate the importance of creating and maintaining environmentally conscious communities Thompson describes the evolution of agrarian values in America following the path blazed by Thomas Jefferson John Steinbeck and Wendell Berry Providing a pragmatic approach to ecological responsibility and commitment *The Agrarian Vision* is a significant compelling argument for the practice of a reconfigured and expanded agrarianism in our efforts to support modern industrialized culture while also preserving the natural world *Under The Blade* Thomas Lyson, 2018-05-04 *Under the Blade* The Conversion of Agricultural Landscapes examines the patterns causes and consequences of current land use decisions in the United States particularly the conversion of farmland to housing roads and other development Changes in land use are the result of complex interactions among law economics landscape characteristics social and political forces ethics and aesthetics By examining farmland loss from each of these perspectives and then integrating the results into policy recommendations *Under the Blade* makes an important contribution to the ongoing debate on the optimal use of a finite resource land In 1998 the last farm in Des Plaines Illinois was subdivided Seven acres along the Niobrara River in north central Nebraska sold for USD5700 per acre twenty times the price for agricultural use Waukesha County Wisconsin although still largely in agriculture has been almost entirely zoned for small lot subdivisions Nationwide the cumulative effect of thousands of individual land use decisions is an orgiastic devouring of the countryside that consumes at least 1.4 million acres of rural land each year and fragments a much larger area The effects on landscape functions include loss of agricultural production water pollution increases in local runoff and flooding loss of habitat and biodiversity and the loss of natural beauty In exchange we get malls retail strips and an ugly sprawl that degrades people and

community How have we come to this and more importantly how might we find a better sustainable approach to the use of land Land use decisions are the result of complex interactions among law economics landscape characteristics population growth social and political forces ethics and aesthetics Under the Blade The Conversion of Agricultural Landscapes examines the loss of farmland and other rural lands from each of these perspectives and shows how interactions among different factors greatly complicate sustainable land management Included throughout the seven main chapters of the book are descriptions of some of the tools and strategies that can be used to preserve farmland and guide development The application of these tools is illustrated by 22 case studies of towns and regions throughout the United States each with a somewhat different challenge response and degree of success or failure Dietrich Bonhoeffer a Protestant theologian hanged by the Nazis in 1945 stated that the ultimate test of a moral society is the kind of world that it leaves to its children Our current choices in the use of the land are among the most important factors shaping that future world and Under the Blade demonstrates that the quality of that future is far from certain The Association of Illustrators' Third Annual, 1977-78 Association of Illustrators (Great Britain),1979 *Food Biotechnology in Ethical Perspective* Paul B. Thompson,2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson s path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson s unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system **Transforming Food and Agricultural Policy** Carsten Daugbjerg,Peter Feindt,2019-12-18 Western democratic welfare states often featured sectoral governance arrangements where governments negotiated policy with sectoral elites based on shared ideas and exclusive institutional arrangements Food and agriculture policy is widely considered an extreme case of compartmentalized and exceptionalist policy making where sector specific policy ideas and institutions provide privileged access for sectoral interest groups and generate policies that benefit their members In the last two decades policy exceptionalism has been under pressure from internationalization of policy making increasing

interlinkage of policy areas and trends towards self regulation liberalization and performance based policies This book introduces the concept of post exceptionalism to characterize an incomplete transformation of exceptionalist policies and politics which preserves significant exceptionalist features Post exceptional constellations of ideas institutions interests and policies can be complementary and stable or tense and unstable Food and agriculture policy serves as an example to illustrate an incomplete transformation towards a more open contested and networked politics Chapters on agricultural policy making in the European Union and the United States the politics of food in Germany and the United Kingdom transnational organic standard setting and global food security debates demonstrate how postexceptionalism helps to understand the co existence of transformation and path dependency in contemporary public policies The chapters in this book were originally published as a special issue of the Journal of European Public Policy Rural Development Perspectives ,1994 **Food and Agricultural Biotechnology in Ethical Perspective** Paul B. Thompson,2020-11-09 This 3rd edition of Food and Agricultural Biotechnology in Ethical Perspective updates Thompson s analysis to reflect the next generation of biotechnology including synthetic biology gene editing and gene drives The first two editions of this book published as Food Biotechnology in Ethical Perspective in 1997 and 2007 were the first comprehensive philosophical studies of genetic engineering applied to food systems The book is structured with chapter length treatments of risk in four categories food safety to animals to the environment and socio economic risks These chapters are preceded by two chapters providing orientation to the uses of gene technology in food and agriculture and to the goals methods and background assumptions of technological ethics There is also a chapter covering all four types of risk as applied to the first US technology recombinant bovine somatotropin The last four chapters take up 1 intellectual property debates 2 religious metaphysical and intrinsic objections to biotechnology 3 issues in risk and trust and 4 a review of ethical issues in synthetic biology gene editing and gene drives the three key technologies that have emerged since the book was last revised

Handbook of Public Sector Economics Donijo Robbins,2017-09-25 The Handbook of Public Sector Economics builds an understanding of the role of public economics in public administration public policy and decision making The handbook introduces a wide variety of current issues related to the public provision and production of goods and services The volume documents the history of economics and fiscal doctrine explores the theory of public goods and the structures from which resources are collected and expanded and analyzes heavily debated issues of economics that are important to current and future practitioners of public policy and administration It focuses on the effects of fiscal policy on savings and investment consumer behavior labor supply wealth property and trade Written in a simple and straightforward style the initial chapters establish the foundation of public economics with the subsequent chapters addressing the collection and distribution of government resources and market reactions to fiscal policies *Reflexive Governance for Global Public Goods* Eric Brousseau,Tom Dedeurwaerdere,Bernd Siebenhüner,2012 Global public goods GPGs the economic term for a broad range of

goods and services that benefit everyone including stable climate public health and economic security pose notable governance challenges At the national level public goods are often provided by government but at the global level there is no established state like entity to take charge of their provision The complex nature of many GPGs poses additional problems of coordination knowledge generation and the formation of citizen preferences This book considers traditional public economy theory of public goods provision as oversimplified because it is state centered and fiscally focused It develops a multidisciplinary look at the challenges of understanding and designing appropriate governance regimes for different types of goods in such areas as the environment food security and development assistance The chapter authors all leading scholars in the field explore the misalignment between existing GPG policies and actors incentives and understandings They analyze the complex impact of incentives the involvement of stakeholders in collective decision making and the specific coordination needed for the generation of knowledge The book shows that governance of GPGs must be democratic reflexive emphasizing collective learning processes and knowledge based in order to be effective

Government Budgeting and Financial Management in Practice Gerald J. Miller, 2017-09-25 The right turn in U S politics has increased conflict over both ends and means in government budgeting and financial management Overlapping and competing views of the way the world works drive finance officials practice Taking a new look at public financial management that acknowledges the multiple competing realities *Government Budgeting and Financial Management in Practice Logics to Make Sense of Ambiguity* examines transaction cost economics and other small government managed by the market techniques as the latest reincarnation of public budgeting and financial management orthodoxy Gerald J Miller reviews new research on the continuing validity of the political dimension of government finance decisions and the multiple intensely argued constructions of reality the finance official must make sense of Miller discusses major advances in interpretive approaches to budgeting and finance and how they dominate writing in the broader field of public administration He also examines the effects of the explosion of information systems new budget techniques nonconventional ways of spending and new technologies The book uses a question as the motivating force to understand some facets of today s government budgeting finance and financial management where do the critical assumptions come from to drive financial management Miller takes the history of reform developments in the field and the logics finance officials say they use as sources for these assumptions and examines what they reveal about constructions of the government finance world Exploring new avenues of financial management thinking the book discusses ambiguity and interpretations that move the unclear preferences ends and goals toward consensus The author identifies an alternative approach to research that explains important facets of financial management This approach is drawn directly from practice events and problems in public organizations and from the creedal bent of many political actors in competition

The Publishers' Trade List Annual ,1884 [Environmental Management](#) Geoff A. Wilson, Raymond L. Bryant, 2021-07-06 First published in 1997 An introductory text on environmental management with a global coverage

including attention paid to the Third World The perspective of the book is geographical and the treatment draws on the broad and complementary experience of the two authors

Alternative Political Economy Models of Transition John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition

Regulating Agriculture Philip Lowe, Terry Marsden, Sarah Whatmore, 2023-06-08 Originally published in 1994 this volume brings together a set of essays reflecting the complex political social and institutional problems encountered by modern states in seeking to manage their agricultural sectors Drawing on different national and international viewpoints the essays present original analyses of agricultural regulation in a comparative context The aspects covered include the roots of the post war food order the roles of corporatism agribusiness and technological change the challenge of de regulation and environmental reforms the introduction of market principles and mechanisms into centrally planned economies and the efforts to forge a new order in international trade

Together at the Table Patricia Allen, 2004-01-01 Everywhere you look people are more aware of what they eat and where their food comes from In a cafeteria in Los Angeles children make their lunchtime food choices at fresh fruit and salad bars stocked with local foods In a community garden in New York low income residents are producing organically grown fruits and vegetables for their own use and to sell at market In Madison Wisconsin shoppers select their food from a bounty of choices at a vibrant farmers market Together at the Table is about people throughout the United States who are building successful alternatives to the contemporary agrifood system and their prospects for the future At the heart

of these efforts are the movements for sustainable agriculture and community food security. Both movements seek to reconstruct the agrifood system, the food production chain from the growing of crops to food production and distribution, to become more ecologically sound, economically viable, and socially just. Allen describes the ways in which people working in these movements view the world and how they see their place in challenging and reshaping the agrifood system. She also shows how ideas and practices of sustainable agriculture and community food security have already woven their way into the dominant agrifood institutions. Allen explores the possibilities this process may hold for improving social and environmental justice in the American agrifood system. Together at the Table is an important reminder that much work still remains to be done. Now that the ideas and priorities of alternative food movements have taken hold, it is time for the next, even more challenging step. Alternative agrifood movements must acknowledge and address the deeper structural and cultural patterns that constrain the long-term resolution of social and environmental problems in the agrifood system.

The Politics of Problem Definition David A. Rochefort, Roger W. Cobb, 1994. At the nexus of politics and policy development lies persistent conflict over where problems come from, what they signify, and based on the answers to those questions, what kinds of solutions should be sought. Policy researchers call this process problem definition. Written for both scholars and students, this book explains how and why social issues come to be defined in different ways, how these definitions are expressed in the world of politics, and what consequences these definitions have for government action and agenda-setting dynamics. The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high-profile social issues like AIDS, drugs, and sexual harassment, as well as for problems like traffic congestion, plant closings, agricultural tax benefits, and air transportation. By examining the way social problems are framed for political discussion, the authors illuminate the unique impact of beliefs, values, ideas, and language on the public policymaking process and its outcomes. In so doing, they establish a common vocabulary for the study of problem definition, review and critique the insights of existing work on the topic, and identify directions for future research.

The Political Theories of Risk Analysis Nicholas P. Guehlstorf, 2012-11-03. The purpose of this study is to question whether liberal political theories ought to inform the way policymakers and administrators analyze risk in proposed courses of environmental practice. In order to explore the relationship of liberal theory to rational practice in environmental policy, this project examines the risk analysis used to approve the genetically engineered bovine growth hormone in American agricultural policy. The Political Theories of Risk Analysis suggests that American environmental public policy is attempting to assess danger with an incomplete notion of utility, to eliminate the hazards of society with an inadequate contractual justification of political authority, and to publicly debate accepted levels of risk with an unfulfilled critical social theory. Because environmental risk analyses are incorrectly perceived as technically rational and socially apolitical, they result in practices that are muddled and misdirected. Making theoretical foundations explicit, however, could lead to improved practice. Public

policy and administrative decisions regarding agricultural biotechnologies should and can function with more concern for democratic values The Political Theories of Risk Analysis is for environmental scientists philosophers public policy planners applied ethicists political scientists and environmentalists Geographies of Meat Harvey Neo,Jody Emel,2017-03-16 With the ever rising demand for meat around the world the production of meat has changed dramatically in the past few decades What has brought about the increasing popularity and attendant normalization of factory farms across many parts of the world What are some of the ways to resist such broad convergences in meat production and how successful are they This book locates the answers to these questions at the intersection between the culture science and political economy of meat production and consumption It details how and why techniques of production have spread across the world albeit in a spatially uneven way It argues that the modern meat production and consumption sphere is the outcome of a complex matrix of cultural politics economics and technological faith Drawing from examples across the world including America Europe and Asia the tensions and repercussions of meat production and consumption are also analyzed From a geographical perspective food animals have been given considerably less attention compared to wild animals or pets This book framed conceptually by critical animal studies governmentality and commodification is a theoretically driven and empirically rich study that advances the study of food animals in geography as well as in the wider social sciences
