Sacred Game:

Spirituality, Sport, and Doping: More than Just a Game Tracy J. Trothen, 2018-10-24 This book explores the deeper meaning of sports Drawing on contemporary research the author makes a strong case for why we should see sport not only in terms of religion but more importantly as a possible location for spiritual meaning Taking this a step farther she considers how gene editing robotics and other biomedical technological enhancements affect not only sports performances but experiences of sport as sacred In addition the author explores what difference it might make to the enhancement debate if sports spirituality is taken seriously The author is not afraid to explore the issue in all its complexity Yet the argument she presents is both meaningful and accessible This investigation applies insights from Christian theology applied ethics psychology and sports studies From lightweight tennis racquets to anabolic steroids athletes have long used technology and science to improve their performances But until now no one has asked how biomedical technological enhancements might affect the undervalued spiritual dimension of sport This book presents rich insights into the connection between sports spirituality and human enhancement technologies It will appeal to researchers athletes and sports followers and undergraduate and graduate students in ethics sport religion or theology *Ragnarok: The Vanir* Tim Korklewski, 2019-12-26 The Aesir are dead and the Vanir now uncontested in their divinity come to claim what is left of the Nine Realms The war clans must oppose or align with these new foes Ragnarok The Vanir features new Godsparks that war clans may harness to combat the marauding Vanir as well as new scenarios monsters and options to further develop players campaigns The Love of Nature and the End of the World Shierry Weber NicholSEN, 2003-02-28 A psychological exploration of how the love of nature can coexist in our psyches with apathy toward environmental destruction Virtually everyone values some aspect of the natural world Yet many people are surprisingly unconcerned about environmental issues treating them as the province of special interest groups Seeking to understand how our appreciation for the beauty of nature and our indifference to its destruction can coexist in us Shierry Weber NicholSEN explores dimensions of our emotional experience with the natural world that are so deep and painful that they often remain unspoken The Love of Nature and the End of the World is a gathering of meditations and collages Its evocations of our emotional attachment to the natural world and the emotional impact of environmental deterioration are meant to encourage individual and collective reflection on a difficult dilemma NicholSEN draws on work in environmental philosophy and ecopsychology the writings of psychoanalytic thinkers such as Wilfred Bion Donald Meltzer and D W Winnicott and ideas from Buddhist and Sufi traditions She shows how our emotional responses to the vulnerabilities of the natural world range from intense caring and compassion through grief and outrage to diffuse depression Individual chapters focus on silence and the process whereby we move from the unspoken to the spoken the love of nature the perceptual reciprocity with the natural world to which we might mature beauty in the human and natural realms the psychological impact of the destruction of the natural world and reflections on the future

Native Americans Leigh Hoven, 1990 **WHOLE LANGUAGE COOPERATIVE LEARNING ACROSS THE CURRICULUM FOR INTERMEDIATE GRADES** Library of Congress Subject Headings Library of Congress, 2010 *Interface* Branden Hookway, 2014-04-04 A cultural theory of the interface as a relation that is both ubiquitous and elusive drawing on disciplines from cultural theory to architecture In this book Branden Hookway considers the interface not as technology but as a form of relationship with technology The interface Hookway proposes is at once ubiquitous and hidden from view It is both the bottleneck through which our relationship to technology must pass and a productive encounter embedded within the use of technology It is a site of contestation between human and machine between the material and the social between the political and the technological that both defines and elides differences A virtuoso in multiple disciplines Hookway offers a theory of the interface that draws on cultural theory political theory philosophy art architecture new media and the history of science and technology He argues that the theoretical mechanism of the interface offers a powerful approach to questions of the human relationship to technology Hookway finds the origin of the term interface in nineteenth century fluid dynamics and traces its migration to thermodynamics information theory and cybernetics He discusses issues of subject formation agency power and control within contexts that include technology politics and the social role of games He considers the technological augmentation of humans and the human machine system discussing notions of embodied intelligence Hookway views the figure of the subject as both receiver and active producer in processes of subjectification The interface he argues stands in a relation both alien and intimate vertiginous and orienting to those who cross its threshold Explanations in Iconography Carol Diaz-Granados, 2023-10-15 Case studies combine archaeological data and oral tradition to illustrate how the archaeological expression of beliefs and meanings passed down in the oral tradition may be interpreted Explanations in Iconography Ancient American Indian Art Symbol and Meaning is a significant contribution to the field of archaeology a contribution in iconography studies that has gradually been coming into its own Iconography is a rich and fascinating field as applied to the complex and heretofore enigmatic imagery on many ancient Pre Columbian artifacts When viewed through the lens of early ethnographic records and American Indian oral traditions as well as information from knowledgeable American Indian elders it opens a world of understanding and clarity until recently unknown in the field of anthropological archaeology It brings us closer to the people who created the artifacts and offers a glimpse into the symbols and beliefs that were important to them Chapters cover a wide variety of artifacts and imagery from several ancient American Indian cultures These artifacts include petroglyphs and pictographs rock art mounds engraved shell cups and gorgets burial architecture and grave furniture pottery copper repouss and other media Ancient graphics engravings mounds and all were created to deliver a message to the viewer and many of those messages are finally coming to light The artifacts included are from a variety of regions mainly in the Midwest and Eastern United States We hope that this volume will encourage others to look more deeply into the meaning behind the ancient imagery and arts and give the past a chance to be known **Understanding Sport as**

The Idea of Wilderness Max Oelschlaeger, 1991-01-01 How has the concept of wild nature changed over the millennia And what have been the environmental consequences In this broad ranging book Max Oelschlaeger argues that the idea of wilderness has reflected the evolving character of human existence from Paleolithic times to the present day An intellectual history it draws together evidence from philosophy anthropology theology literature ecology cultural geography and archaeology to provide a new scientifically and philosophically informed understanding of humankind's relationship to nature Oelschlaeger begins by examining the culture of prehistoric hunter gatherers whose totems symbolized the idea of organic unity between humankind and wild nature and idea that the author believes is essential to any attempt to define human potential He next traces how the transformation of these hunter gatherers into farmers led to a new awareness of distinctions between humankind and nature and how Hellenism and Judeo Christianity later introduced the unprecedented concept that nature was valueless until humanized Oelschlaeger discusses the concept of wilderness in relation to the rise of classical science and modernism and shows that opposition to modernism arose almost immediately from scientific literary and philosophical communities He provides new and in some cases revisionist studies of the seminal American figures Thoreau Muir and Leopold and he gives fresh readings of America's two prodigious wilderness poets Robinson Jeffers and Gary Snyder He concludes with a searching look at the relationship of evolutionary thought to our postmodern effort to reconceptualize ourselves as civilized beings who remain in some ways natural animals

The Necessity of Theater Paul Woodruff, 2008-04-30 What is unique and essential about theater What separates it from other arts Do we need theater in some fundamental way The art of theater as Paul Woodruff says in this elegant and unique book is as necessary and as powerful as language itself Defining theater broadly including sporting events and social rituals he treats traditional theater as only one possibility in an art that at its most powerful can change lives and as some peoples believe bring a divine presence to earth The Necessity of Theater analyzes the unique power of theater by separating it into the twin arts of watching and being watched practiced together in harmony by watchers and the watched Whereas performers

practice the art of being watched making their actions worth watching and paying attention to action choice plot character mimesis and the sacredness of performance space audiences practice the art of watching paying close attention A good audience is emotionally engaged as spectators their engagement takes a form of empathy that can lead to a special kind of human wisdom As Plato implied theater cannot teach us transcendent truths but it can teach us about ourselves

Characteristically thoughtful probing and original Paul Woodruff makes the case for theater as a unique form of expression connected to our most human instincts The Necessity of Theater should appeal to anyone seriously interested or involved in theater or performance more broadly

Godwired Rachel Wagner, 2012-03-12 Godwired offers an engaging exploration of religious practice in the digital age It considers how virtual experiences like stories games and rituals are forms of world building or cosmos construction that serve as a means of making sense of our own world Such creative and interactive activity is arguably patently religious This book examines the nature of sacred space in virtual contexts technology as a vehicle for sacred texts who we are when we go online what rituals have in common with games and how they work online what happens to community when people worship online how religious worlds and virtual worlds nurture similar desires Rachel Wagner suggests that whilst our engagement with virtual reality can be viewed as a form of religious activity today's virtual religion marks a radical departure from traditional religious practice it is ephemeral transient rapid disposable hyper individualized hybrid and in an ongoing state of flux

Biography and the Question of Literature in France Ann Jefferson, 2007-01-04 This book takes a fresh look at the relations between literature and biography by tracing the history of their connections through three hundred years of French literature The starting point for this history is the eighteenth century when the term biography first entered the French language and when the word literature began to acquire its modern sense of writing marked by an aesthetic character Arguing that the idea of literature is inherently open to revision and contestation Ann Jefferson examines the way in which biographically orientated texts have been engaged in questioning and revising definitions of literature At the same time she tracks the evolving forms of biographical writing in French culture and proposes a reappraisal of biography in terms not only of its forms but also of its functions Although Ann Jefferson s book has powerful theoretical implications for both biography and the literary it is first and foremost a history offering a comprehensive new account of the development of French literature through this dual focus on the question of literature and on the relations between literature and biography It offers original readings of major authors and texts in the light of these concerns beginning with Rousseau and ending with life writing contemporary authors such as Pierre Michon and Jacques Roubaud Other authors discussed include Mme de St el Victor Hugo Sainte Beuve Barbey d Aureilly Baudelaire Nerval Mallarm Schwob Proust Gide Leiris Sartre Genet Barthes and Roger Laporte
