Sacred Pain Hurting The Body For The Sake Of The Soul:

Sacred Pain Ariel Glucklich, 2001 Why would anyone seek out the very experience the rest of us most wish to avoid Why would religious worshipers flog or crucify themselves sleep on spikes hang suspended by their flesh or walk for miles through scorching deserts with bare and bloodied feet In this insightful new book Ariel Glucklich argues that the experience of ritual pain far from being a form of a madness or superstition contains a hidden rationality and can bring about a profound transformation of the consciousness and identity of the spiritual seeker Steering a course between purely cultural and purely biological explanations Glucklich approaches sacred pain from the perspective of the practitioner to fully examine the psychological and spiritual effects of self hurting He discusses the scientific understanding of pain drawing on research in fields such as neuropsychology and neurology He also ranges over a broad spectrum of historical and cultural contexts showing the many ways mystics saints pilgrims mourners shamans Taoists Muslims Hindus Native Americans and indeed members of virtually every religion have used pain to achieve a greater identification with God He examines how pain has served as a punishment for sin a cure for disease a weapon against the body and its desires or a means by which the ego may be transcended and spiritual sickness healed When pain transgresses the limits the Muslim mystic Mizra Asadullah Ghalib is quoted as saying it becomes medicine Based on extensive research and written with both empathy and critical insight Sacred Pain explores the uncharted inner terrain of self hurting and reveals how meaningful suffering has been used to heal the human spirit

studies *Pain Narratives in Greco-Roman Writings* ,2023-07-03 Why is it so difficult to talk about pain As we do today the Greeks and Romans struggled to communicate their pain this required a rich and subtle vocabulary which had to be developed over time Pain Narratives traces the development of this language in literary philosophical and medical texts from across antiquity poets physicians and philosophers contributed to an ever growing lexicon to articulate their own and others feelings The essays within this volume uncover the expanding Greco Roman vocabulary of pain analyse the medical discussions on pain symptoms and explore the religious reinterpretations of pain concepts in late antiquity Knowledge and Pain ,2012-01-01 Pain studies both in exact sciences and in the humanities are a fast shifting field This volume condenses a spectrum of recent views of pain through the lens of humanistic studies Methodologically the volume is an interdisciplinary study of the questions pertaining to the accessibility of pain physical or emotional to understanding and of the possible influence of suffering on the enhancement of knowledge in private experience or public sphere Undeterred by the widespread belief that pain cannot be expressed in language and that it is intransmissible to others the authors of the essays in the collection show that the replicability of records and narratives of human experience provides a basis for the kind of empathetic attention dialogue and contact that can help us to register the pain of another and understand its conditions and contexts Needless to say the improvement of this understanding may also help map the ways for the ethics of response to and help for pain Whereas the authors of the volume tend to share the view of pain as a totally negative phenomenon the position taken in Elaine Scarry s *The Body in Pain* they hold this view applicable mainly to the attitudes to the pain of others and the imperative of minimise the causes of another s suffering They also consider this view to be culturally and temporally circumscribed The volume suggests that one s own personal experience of suffering along with the awareness of the seriality of such experience among fellow sufferers can be conducive to emotional and intellectual growth The reading of literature dealing with pain can lead to similar results through vicariously experienced suffering whose emotional corollaries and intellectual consequences may be conveyed through artistic rather than discursive means The distinctive features of the volume are that it processes these issues in a historicising way deploying the history of the ideas of pain from the Middle Ages to the present day and that it makes use of the methodology of different disciplines to do so arriving to similar conclusions through as it were different paths The disciplines include analytic philosophy historiography history of science oral history literary studies and political science **Suffering and the Christian Life** Rachel Davies,2019-12-26 This volume approaches questions concerning the status and meaning of suffering in Christian life and Christian theology through the lens of a variety of theological disciplines biblical historical practical political and systematic theology Scholars from this range of fields concentrate on a number of questions Is love intrinsically linked with suffering Are suffering and loss on some level fundamentally good How is and how should suffering and diminishment be viewed in the Christian tradition Featuring leading voices that include Linn Tonstad Bernard McGinn Anna Rowlands John Swinton and Paul Murray this volume brings

together essays touching on concrete issues such as cancer mental health and the experience of refugees and discusses broad themes including vulnerability kenosis and tragedy In correlating these themes with the examination of texts ranging from Paul s letters to works of the Cappadocians Thomas Aquinas John of the Cross and Mother Teresa Suffering and the Christian Life offers fresh and accessible academic approaches to a question of vital personal existential significance

Dharma of the Dead

Christopher M. Moreman,2018-07-10 With the increased popularity of zombies in recent years scholars have considered why the undead have so captured the public imagination This book argues that the zombie can be viewed as an object of meditation on death a memento mori that makes the fact of mortality more approachable from what has been described as America s death denying culture The existential crisis in zombie apocalyptic fiction brings to the fore the problem of humanity s search for meaning in an increasingly global and secular world Zombies are analyzed in the context of Buddhist thought in contrast with social and religious critiques from other works

Incarnation, Pain, Theology Espen Dahl,2024-06-15 How the phenomenology of pain allows us to rethink human incarnation While the phenomenological tradition has carefully treated

both the objective and the lived body Espen Dahl explores a dimension of the body that does not fall neatly into either category suggesting that philosophers should take account of the inner density of our organic material body By integrating the dimension of flesh and blood into the phenomenological notion of the body Dahl argues that it is possible to reach a more adequate notion of human incarnation The author explores the body in its subjectivity and its resistance in activity founded on passivity and in the ambiguous limits of its skin The phenomenon of pain is given particular attention in this investigation since pain is as Dahl argues what makes the body inescapably manifest in its otherwise hidden dimensions including its ambiguity and vulnerability Related to this focus Dahl also engages with the Christian theological concerns of incarnation pain and hope Phenomenologists have long drawn on this religious inheritance particularly in what has been dubbed the French theological turn In a similar manner Incarnation Pain Theology A Phenomenology of the Body draws on these theological sources while firmly holding to its philosophical commitments in methodological approach and analytic aims

Rethinking Pain in Person-Centred Health Care Stephen Buetow, 2020-12-30 This book explores how person centred health care could be refined to help persons alleviate pain related distress and construct pain as a potentially positive experience Rethinking Pain in Person Centred Health Care is a fascinating contribution to the multidisciplinary literature on person centred health care pain and ethics Traditionally Western intellectual culture has downplayed the intuitive and emotional promoting instead rational natural scientific perspectives Applied to pain an instrumental approach promotes the immediate and effective relief of pain due to the widespread suffering and expense it can cause However different persons experience pain in different ways and Buetow moves beyond a commitment to eliminate pain to exploring how benefits of pain could include creating and managing meaning from pain Rather than always looking to put pain behind them persons may flourish by moving around pain through pain into pain and above pain Buetow argues that this model depends on adopting a person centred approach to health care focusing less on the condition of pain and more on mobilizing the persons who present with and manage pain This book will be of interest to professionals and academics researchers in the fields of psychology and psychiatry who have a special interest in people with persistent pain conditions It will also be an invaluable resource for physiotherapists chronic pain consultants in secondary care and GPs The Modulated Scream Esther
