**The Oxford Handbook of Africa and Economics** Célestin Monga,Justin Yifu Lin,2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today's high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the Oxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book

This yearly publication records the **The Law of Energy for Sustainable Development** IUCN Academy of Environmental Law.

Colloquium, 2005 The research focus for the IUCN Academy of Environmental Law in 2003 was a timely and challenging one entitled The Law of Energy for Sustainable Development. As contemporary world politics demonstrates, energy resources and generation are crucial issues facing the international community. As research on energy law at the international, regional and national level is in its infancy, the insights provided by the contributors to this 2005 volume are a significant addition to the field. Indexing Structural Distortion: Sectoral Productivity, Structural Change and Growth Sakai Ando, Koffie Ben Nassar, 2017-09-20 This paper proposes a new index of sectoral labor distortion using employment and value-added shares. We show that this index is highly correlated with growth both cross-sectionally and over time. We also use it to compare the degree of distortion among countries and identify sectors where the potential payoffs in terms of growth from reforms could be large. The regression analysis in the paper shows that education and various structural reforms have potential to improve the efficiency of sectoral labor allocation. **The Palgrave Handbook on China-Europe-Africa Relations** Yichao Li, Francisco José B. In addition, the fourth part not only focuses on China-Europe-Africa but also extends to chapters on multilateralism and relations with other countries, regions and economic communities. In doing so, the book also addresses topics on the Ukraine war, Covid-19, the Belt and Road Initiative, the Global Gateway and the balance of major powers.
