The Paleobiology of Australopithecus Kaye E. Reed, John G Fleagle, Richard E Leakey, 2013-03-15 Australopithecus species have been the topic of much debate in palaeoanthropology since Raymond Dart described the first species Australopithecus africanus in 1925 This volume synthesizes the geological and paleontological context of the species in East and South Africa covers individual sites such as Dikika Hadar Sterkfontein and Malapa debates the alpha taxonomy of some of the species and addresses questions regarding the movements of the species across the continent Additional chapters discuss the genus in terms of sexual dimorphism diet reconstruction using microwear and isotopic methodologies postural and locomotor behavior and ontogeny

Hominin Postcranial Remains from Sterkfontein, South Africa, 1936-1995 Bernhard Zipfel, Brian G. Richmond, Carol V. Ward, 2020-05-07 The 1924 African discovery of an early hominin child's skull referred to as Australopithecus africanus by Raymond Dart was a major event in the history of paleoanthropology This provided the first evidence of early hominins in Africa and overturned conventional ideas about human evolution Subsequent discoveries of A africanus fossils notably from cave deposits at Sterkfontein yielded the first evidence that early hominins were habitual bipeds Fifty years after this the discovered wealth of fossil evidence in eastern Africa of the slightly older and craniodentally more primitive taxon A afarensis catalyzed debates about the origin and evolution of human gait and the phylogenetic relationships among early hominins This formed the main basis of our understanding of early hominin bipedality and paleobiology Little attention has been paid to the variation among species in postcranial anatomy and locomotion although intriguing hints are beginning to appear in the literature Did multiple varieties of bipedality evolve Did australopithecus species differ in positional or manipulative abilities body proportions or patterns of sexual dimorphism These are critical questions for understanding the evolution of australopithecus and hominin locomotion In this book Bernhard Zipfel Brian

Richmond Carol Ward and the most knowledgeable scholars in their respective fields provide groundbreaking accounts for each postcranial fossil and expert examinations into the background of each fossil. The volume collects the published articles of Dr Marjorie Topley who was a pioneer in the field of social anthropology in the postwar period and also the first president of the revived Hong Kong Branch of the Royal Asiatic Society. Her ethnographic research in Singapore and Hong Kong set a high standard for urban anthropology and helped creating the fields of religious studies, migration studies, gender studies, and medical anthropology, focusing on topics that remain current and important in the disciplines. The essays in this collection showcase Dr Topley's groundbreaking contributions in several areas of scholarship. These include *Chinese Women's Vegetarian Houses in Singapore 1954* and *The Great Way of Former Heaven: A Group of Chinese Secret Religious Sects 1963*, both important research on the study of subcultural groups in a complex urban society; *Marriage Resistance in Rural Kwangtung 1978*, now a classic in Chinese anthropology and women's studies; her widely known and cited article *Cosmic Antagonisms: A Mother-Child Syndrome 1974*, which investigates widely shared everyday practices and cosmological explanations that Cantonese mothers invoked when they encountered difficulties in child rearing; and *Capital Saving and Credit among Indigenous Rice Farmers and Immigrant Vegetable Farmers in Hong Kong's New Territories 2004*. 1964 **A Companion to Biological Anthropology** Clark

Chinese Spirit-Medium Cults in Singapore Alan Elliott, 2020-08-19 The concentration of this monograph on Chinese spirit mediumship in Singapore is chiefly a device for focussing attention upon the most typical although rather extreme manifestation of the major religious orientation of the overseas Chinese The accounts given here may chiefly be of value as a detailed record of religious rites but it is hoped that the rites shown in their institutional context can also throw some light upon the wider ramifications of culture and society among the Chinese

Program of Section I-IX ..., 1915 *The First Humans* Frederick E. Grine, John G. Fleagle, Richard E. Leakey, 2009-05-24 There are some issues in human paleontology that seem to be timeless Most deal with the origin and early evolution of our own genus something about which we should care Some of these issues pertain to taxonomy and systematics How many species of *Homo* were there in the Pliocene and Pleistocene How do we identify the earliest members of the genus *Homo* If there is more than one *Plio*

Pleistocene species how do they relate to one another and where and when did they evolve Other issues relate to questions about body size proportions and the functional adaptations of the locomotor skeleton When did the human postcranial Bauplan evolve and for what reasons What behaviors and what behavioral limitations can be inferred from the postcranial bones that have been attributed to *Homo habilis* and *Homo erectus* Still other issues relate to growth development and life history strategies and the biological and archeological evidence for diet and behavior in early *Homo* It is often argued that dietary change played an important role in the origin and early evolution of our genus with stone tools opening up scavenging and hunting opportunities that would have added meat protein to the diet of *Homo* Still other issues relate to the environmental and climatic context in which this genus evolved [Senate documents](#) ,1880 **Chinese Death Rituals in Singapore** Tong Chee Kiong,2004-03-01 Through a cultural analysis of the symbols of death flesh blood bones souls time numbers food and money Chinese Death Rituals in Singapore throws light upon the Chinese perception of death and how they cope with its eventuality In the seeming mass of religious rituals and beliefs it suggests that there is an underlying logic to the rituals This in turn leads Kiong to examine the interrelationship between death and the socioeconomic value system of China as a whole *Annual Report of the Board of Regents of the Smithsonian Institution* Smithsonian Institution,Smithsonian Institution. Board of Regents,1880 **Improving Medical Education** Institute of Medicine,Board on Neuroscience and Behavioral Health,Committee on Behavioral and Social Sciences in Medical School Curricula,2004-07-28 Roughly half of all deaths in the United States are linked to behavioral and social factors The leading causes of preventable death and disease in the United States are smoking sedentary lifestyle along with poor dietary habits and alcohol consumption To make measurable improvements in the health of Americans physicians must be equipped with the knowledge and skills from the behavioral and social sciences needed to recognize understand and effectively respond to patients as individuals not just to their symptoms What are medical schools teaching students about the behavioral and social sciences In the report the committee concluded that there is inadequate information available to sufficiently describe behavioral and social science curriculum content teaching techniques and assessment methodologies in U S medical schools and recommends development of a new national behavioral and social science database The committee also recommended that the National Board of Medical Examiners ensure that the U S Medical Licensing Examination adequately cover the behavioral and social science subject matter recommended in this report
