**The Making of Singapore Sociology** Tong Chee-Kiong, Lian Kwen-Fee, 2021-11-08 This book presents a collection of essays of how the city state of Singapore's societal dynamics have evolved from the time of its birth as a nation in 1965 to the present. Key areas of Singapore society are explored contributing to the understanding of the social organisation of the city. This study reveals a shift from the modernisation studies in the 1970s to a more political economic turn as a consequence of the influence of dependency and world systems theories. Topics covered include urban studies, family, education, medical care, class and social stratification, work, language, ethnic groups, religion, and crime and deviance. **Sociologies in Dialogue**

Sari Hanafi, Chin-Chun Yi, 2020-07-21 Sociologies in Dialogue brings together expert contributions from international scholars who reflect on the importance of collaboration between diverse sociological perspectives to enhance our understanding of the role of sociology as an academic discipline and as a vehicle for social change. By exploring the distinctive practices and research of a range of sociologists, the book shows how an open dialogue between sociologists is critical to addressing major sociological issues across the globe such as inequality and ethnocentrism and challenging the hierarchies of knowledge production and circulation. Contributors also discuss novel strands in theory and methodology such as multicultural sociology, cosmopolitanism and multiple modernities. An important contribution for researchers and students interested in global sociology, sociological theories and methodologies. **Globalization and the Evolving World Society**, 2021-11-01

The societies of the present world are experiencing many turbulent changes. New forces of change and modernization are driving people, business and cultures across borders. The world has become a home to a new generation of homo sapiens who are curious about others but at the same time cherish to preserve their own cultures. What is the nature of this evolving world society? Is the world driving toward a new global civilization, an end of history, or an inevitable civilizational clash? The present volume has brought together leading scholars in the field to examine the concept of globalization, deliberate on the character of its multifaceted nature and expressions and delineate its impact on the emerging world economy, politics, culture and science. A number of substantive issues such as the emergence of new global economic inequality, culture and the role of the trans-nationals, nature of the emerging global environmental regimes, rise of the NICs and the conflicting role of the nation states in the face of the advancing forces of globalization are addressed. It is contended that globalization should be perceived neither as an unbounded economic progress nor as an expansion of western domination. Globalization is rather defined as a new development strategy, a process of change that can be planned, guided and controlled. For national, political and business leaders of the world, the volume provides a blueprint of the emerging areas of policy concerns and guidance. For the world of social science, it presents a road map of the emerging intellectual issues and challenges. Contributors are Alessandro Bonanno, Stephen W K Chiu, Douglas Constance, Richard J Estes, R Scott Frey, Archibald O Haller, George A Miller, Proshanta K Nandi, Winifred R Poster, J Timmons Roberts, Shahid M Shahidullah, Bam Dev Sharda and Alvin Y So. **The**

**Southeast Asian Journal of Social Science** ,2000      *Rethinking World Bank Influence* D. Brent Edwards Jr.,2023-04-13 Why is it so hard for international development organizations even ones as well resourced and influential as the World Bank to generate and sustain change in the way things are done in those countries where they work Despite what in many cases is decades of investment and effort why do partner governments continue to engage in those traditional patterns and styles of public service management that international development organizations have sought to supplant with methods that are supposedly more accountable efficient and effective This book provides an answer to these questions However rather than pathologizing partner governments as the source of the problem that is rather than maintaining the distinction between doctor international development organizations and patient partner governments wherein the patient is seen as unwilling to take their medicine enacting good governance practices this book instead reframes the relationship The central argument is first that the programs and projects of international organizations are introduced into and are constrained by multiple layers of ritual governance that is performative acts and cultural logics that intersect with and reinforce the political economic and social structures in and through which they operate As is shown the contextual factors that guide governance practices are largely beyond the reach of the international development organizations the relevant logics have their roots in state ideology but also extend back to the colonial logics that continue to operate at the heart of the state apparatus The second the central argument is that international aid organizations and the governments with which they work are engaged in a ritual aid dance where each actor plays a part but does not and cannot acknowledge the ways that it depends on the other for its own gain This relationship can be considered a dance because each participant responds to and needs the other and because both sides do so in ways that are carefully choreographed with the overall trajectory or contours of the dance being more or less known to the participants These arguments are based on research on the World Bank s efforts over the course of several decades to encourage through its financing projects and
