Biodiversity and ecosystem services in Nordic coastal ecosystems J. Berglund, J. Boström, P. Clausen, L. Gamfeldt, H. Gundersen, K. Hancke, J. L. S. Hansen, M. Häggblom, M. Højgård Petersen, H. Ilvessalo-Lax, K.-O. Jacobsen, M. Kvarnström, H.-G. Lax, M. Kjøie Poulsen, K. Magnussen, K. Mustonen, P. Norling, E. Oddsdóttir, E. Postmyr, E. Roth, J. Roto, G. Sogn Andersen, H. Svedäng, J. Sørensen, H. Tunón, S. Våvare, M. Kallio, 2018-06-18 This report contributes to a Nordic IPBES like assessment of biodiversity and ecosystem services in Nordic coastal areas. It is based on ten geographical cases in the Nordic countries: Denmark, Finland, Iceland, Norway, Sweden, and Faroe Islands, Greenland, and land. The purpose is to reflect upon local biodiversity and ecosystem services e.g. status and trends, drivers of change, and policies for governance and what future we are to expect. The cases describe the situation in the N t m area: Kalix archipelago, Quark Lake, Puruvesi Bay of Lumparn, resund, Helgeland archipelago, Faroe Islands, the northern coastline of Iceland, and Disko Bay. It stretches from fresh water areas to ecosystems in the Atlantic Ocean and from urbanised areas with heavy pressures on the environment e.g. resund to sparsely populated areas like Greenland with a population of around 0.03 inhabitants/km². Shamanism Gary Edson, 2014-04-14 The ancient practice of shamanism touches many cultures and spiritual philosophies. This book offers an in-depth look at the beliefs and practices centered on the shaman, a person believed to have powers to heal and communicate with the spirit world. It explores shamanism and its associated myths, artifacts, and legends as a communally endorsed acknowledgment of the supernatural or spirit world that evolved in the Neolithic Period and continues to appeal today. The work is heavily illustrated, featuring more than 90 of the author's drawings of masks, fetishes, carvings, and ongon, and 40 rare photographs of shamans, medicine men, and women, and healers. **Explore Shamanism** Alby Stone, 2003 The Oxford Handbook of the Prehistoric Arctic T. Max Friesen, Owen K. Mason, 2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate, limited range of resources, and remoteness from populated areas. Despite these factors, it holds a complex and lengthy history relating to Inuit, Iupiat, Inuvialuit, Yup'ik, and Aleut peoples and their ancestors. The artifacts, dwellings, and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost, allowing archaeologists to reconstruct their lifeways with great accuracy. Furthermore, the combination of modern Elders' traditional knowledge with the region's high-resolution ethnographic record allows past peoples' lives to be reconstructed to a level simply not possible elsewhere. Combined, these factors yield an archaeological record of global significance. The Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies, the complex process of interaction between indigenous peoples and Europeans, and the dynamic relationships between environment, economy, social organization, and ideology in hunter-gatherer societies. In the The Oxford Handbook of the Prehistoric Arctic, each arctic cultural tradition is described in detail with up-to-date coverage of recent interpretations of all aspects of their lifeways. Additional chapters cover broad themes applicable to the full range of

arctic cultures such as trade stone tool technology ancient DNA research and the relationship between archaeology and modern arctic communities The resulting volume written by the region s leading researchers contains by far the most comprehensive coverage of arctic archaeology ever assembled **Shamanism and Traditional Beliefs** Torben A. Vestergaard,2001 These papers represent the latest research on religion in the North Atlantic The relationship between human society and the other realms is explored looking at ritual dreams imagery and other shamanistic practices There are extensive cross cultural resemblances between such beliefs and practices within the northern regions Historically such issues have taken place in different disciplinary frameworks with limited mutual contact In the tradition of North Atlantic Studies scholars from different disciplines and research communities are brought together in the presentation of common themes in and around the North Atlantic areas In this volume the contributors are anthropologists archaeologists folklorists biologists and presenting a different viewpoint a shamanic therapist *The Foragers of Point Hope* Charles E. Hilton,Benjamin M. Auerbach,Libby W. Cowgill,2014-07-24 Sixty years after their discovery this is the first anthropological synthesis of the ancient Arctic foragers of Point Hope Alaska **Skilled Visions** Cristina Grasseni,2007-01-01 Most arguments for a rediscovery of the body and the senses hinge on a critique of visualism in our globalized technified society This approach has led to a lack of actual research on the processes of visual enskillment Providing a comprehensive spectrum of case studies in relevant contexts this volume raises the issue of the rehabilitation of vision and contextualizes vision in the contemporary debate on the construction of local knowledge vs the hegemony of the socio technical network By maintaining an ethnographic approach the book provides practical examples that are both accessible to undergraduate students and informative for an academic audience *Inuit Studies* ,2003 *Inuit Shamanism and Christianity* Frédéric B. Laugrand,Jarich G. Oosten,2010-01-01 Using archival material and oral testimony collected during workshops in Nunavut between 1996 and 2008 Fr d ric Laugrand and Jarich Oosten provide a nuanced look at Inuit religion offering a strong counter narrative to the idea that traditional Inuit culture declined post contact They show that setting up a dichotomy between a past identified with traditional culture and a present involving Christianity obscures the continuity and dynamics of Inuit society which has long borrowed and adapted outside elements They argue that both Shamanism and Christianity are continually changing in the Arctic and ideas of transformation and transition are necessary to understand both how the ideology of a hunting society shaped Inuit Christian cosmology and how Christianity changed Inuit shamanic traditions
