Plotkin, 2001 Kamanya believes in the shaman's wisdom about the healing properties of plants found in the Amazon rain forest and hopes one day to be a healer for his people **Tales of a Shaman's Apprentice** Mark J. Plotkin, 1993 For thousands of years healers have used plants to cure illness Aspirin the world's most widely used drug is based on compounds originally extracted from the bark of a willow tree and more than a quarter of medicines found on pharmacy shelves contain plant compounds Now Western medicine faced with health crises such as AIDS Alzheimer's disease and cancer has begun to look to the healing plants used by indigenous peoples to develop powerful new medicines Nowhere is the search more

promising than in the Amazon the world's largest tropical forest home to a quarter of all botanical species on this planet as well as hundreds of Indian tribes whose medicinal plants have never been studied by Western scientists In *Tales of a Shaman's Apprentice* ethnobotanist Mark J Plotkin recounts his travels and studies with some of the most powerful Amazonian shamans who taught him the plant lore their tribes have spent thousands of years gleaned from the rain forest For more than a decade Dr Plotkin has raced against time to harvest and record new plants before the rain forests fragile ecosystems succumb to overdevelopment and before the Indians abandon their own culture and learning for the seductive appeal of Western material culture *Tales of a Shaman's Apprentice* relates nine of the author's quests taking the reader along on a wild odyssey as he participates in healing rituals discovers the secret of curare the lethal arrow poison that kills in minutes tries the hallucinogenic snuff *epena* that enables the Indians to speak with their spirit world and earns the respect and fellowship of the mysterious shamans as he proves that he shares both their endurance and their reverence for the rain forest Mark Plotkin combines the Darwinian spirit of the great writer explorers of the nineteenth century curious discursive and rigorously scientific with a very modern concern for the erosion of our environment and the vanishing culture of native peoples
