Shaping American Military Capabilities After The Cold War:

Shaping American Military Capabilities After the Cold War Richard Arlynn Lacquement, 2003 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies Over a decade after the fall of the Soviet Union American forces are a smaller but similar version of their Cold War predecessors The author argues that the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo Shaping American Military Capabilities after the Cold War Richard Lacquement, 2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations **Transforming Military Power since the Cold War** Theo Farrell, Sten Rynning, Terry Terriff, 2013-10-17 An empirically rich account of how the West's main war fighting armies have transformed since the end of the Cold War *The Challenge of Nation-Building* Rebecca Patterson, 2014-09-17 In the last decades the United States Army has often been involved in missions other than conventional warfare These include low intensity conflicts counterinsurgency operations and nation building efforts Although non conventional warfare represents the majority of missions executed in the past sixty years the Army still primarily plans organizes and trains to fight conventional ground wars Consequently in the last ten years there has been considerable criticism regarding the military's inability to accomplish tasks other than conventional war Failed states and the threat they represent cannot be ignored or solved with conventional military might In order to adapt to this new reality the U S Army must innovate This text examines the conditions that have allowed or prevented the U S Army to innovate for nation building effectively By doing so it shows how military leadership and civil military relations have changed Nation building refers to a type of military occupation where the goal is regime change or survival a large number of ground troops are deployed and both military and civilian personnel are used in the political administration of an occupied country with the goals of

establishing a productive economy and a stable government. Such tasks have always been a challenge for the U.S. military, which is not normally equipped or trained to undertake them. Using military effectiveness as the measurement of innovative success, the book analyzes several U.S. nation building cases including post World War II Germany, South Korea from 1945-1950, the Vietnam War, and Operation Iraqi Freedom. By doing so, it reveals the conditions that enabled military innovation in one unique case, Germany, while explaining what prevented it in the others. This variation of effectiveness leads to examine prevailing military innovation theories, threat-based accounts, quality of military organizations, and civil-military relations. This text comes at a critical time as the U.S. military faces dwindling resources and tough choices about its force structure and mission orientation. It will add to the growing debate about the role of civilians, military reformers, and institutional factors in military innovation and effectiveness.

Drawdown Jason W. Warren, 2016-10-18. Analyzes the cultural attitudes, political decisions, and institutions surrounding the maintenance of armed forces throughout American history. While traditionally Americans view expensive military structure as a poor investment and a threat to liberty, they also require a guarantee of that very freedom necessitating the employment of armed forces. Beginning with the seventeenth-century wars of the English colonies, Americans typically increased their military capabilities at the beginning of conflicts only to decrease them at the apparent conclusion of hostilities. In *Drawdown: The American Way of Postwar*, a stellar team of military historians argue that the United States sometimes managed effective drawdowns, sowing the seeds of future victory that Americans eventually reaped. Yet at other times, the drawing down of military capabilities undermined our readiness and flexibility, leading to more costly wars and perhaps defeat. The political choice to reduce military capabilities is influenced by Anglo-American pecuniary decisions and traditional fears of government oppression, and it has been haphazard at best throughout American history. These two factors form the basic American liberty dilemma, the vexed relationship between the nation and its military apparatuses from the founding of the first colonies through to present times. With the termination of large-scale operations in Iraq and the winnowing of forces in Afghanistan, the United States military once again faces a significant drawdown in standing force structure and capabilities. The political and military debate currently raging around how best to affect this force reduction continues to lack a proper historical perspective. This volume aspires to inform this dialogue. Not a traditional military history, *Drawdown* analyzes cultural attitudes, political decisions, and institutions surrounding the maintenance of armed forces.

American Civil-Military Relations Suzanne C. Nielsen, Don M. Snider, 2009-10-05. *American Civil-Military Relations* offers the first comprehensive assessment of the subject since the publication of Samuel P. Huntington's *The Soldier and the State*. Using this seminal work as a point of departure, experts in the fields of political science, history, and sociology ask what has been learned and what more needs to be investigated in the relationship between civilian and military sectors in the 21st century. Leading scholars such as Richard Betts, Risa Brooks, James Burk, Michael Desch, Peter Feaver, Richard Kohn, Williamson Murray, and David Segal discuss key issues, including changes in officer education since the end of the Cold

War shifting conceptions of military expertise in response to evolving operational and strategic requirements increased military involvement in high level politics the domestic and international contexts of U S civil military relations The first section of the book provides contrasting perspectives of American civil military relations within the last five decades The next section addresses Huntington s conception of societal and functional imperatives and their influence on the civil military relationship Following sections examine relationships between military and civilian leaders and describe the norms and practices that should guide those interactions What is clear from the essays in this volume is that the line between civil and military expertise and responsibility is not that sharply drawn and perhaps given the increasing complexity of international security issues it should not be When forming national security policy the editors conclude civilian and military leaders need to maintain a respectful and engaged dialogue Essential reading for those interested in civil military relations U S politics and national security policy

The Case Against Military Intervention Donald M. Snow, 2015-07-16 Since World War II military intervention in developing world internal conflicts DWIC has become the primary form of U S military activity and these interventions have proven unsuccessful in places like Vietnam Iraq and Afghanistan This book argues such failure was entirely predictable even inevitable due both to the nature and dynamics of foreign military intrusion in the affairs of other countries and especially the DWICs that provide the major contemporary form of potential U S military in the foreseeable future Basing its analysis in both human nature the adverse reaction to prolonged outsider intrusion and historical analogy the book argues strongly why military intervention should be avoided as a national security option and the implications of such a policy decision for national security strategy and policy

US Military Innovation Since the Cold War Harvey Sapolsky, Benjamin Friedman, Brendan Green, 2009-04-28 This book explains how the US military reacted to the Revolution in Military Affairs RMA and failed to innovate its organization or doctrine to match the technological breakthroughs it brought about Many called for the transformation of the US military in the years after the end of the Cold War seeking the changes in organization and doctrine that would complete the RMA innovation and a commitment to counter insurgency peace keeping and nation building missions This volume describes the origins uses and limits of the RMA technologies examines how each of the five US armed services categorising the Special Operations as a separate service made their adjustments both to the technologies and the use of force and how the role of the civilian officials and the defense industry altered in this process of change and avoidance of change The book examines the internal politics of the services as well as civil military relations to identify the external pressures on the services for significant change in their doctrine and weapons Many have noted the failure of the services to innovate in what can be called the Second Inter war Period the years after the Cold War This book offers explanations for this failure and arguments about the possible range and desirability of military innovation in the post Cold war era This book will be of great interest to students of strategic studies US defence politics military studies and US politics Harvey M Sapolsky is Professor of Public Policy and Organization in the Department of Political Science at MIT and

former Director of the Security Studies Program Benjamin H Friedman is a Research Fellow in Defense and Homeland Security Studies at the Cato Institute and a Ph D Candidate in Political Science at MIT Brendan Green is a Ph D Candidate in Political Science at MIT and an affiliate of the Security Studies Program U.S. Army War College Guide to National Security Issues: National security policy and strategy J. Boone Bartholomees, Army War College (U.S.). Strategic Studies Institute, 2012 Volume II continues the analyses and discussion of national security policy and strategy **Leadership and Policy Innovation--from Clinton to Bush** Joseph R. Cerami, 2013 Smartly and appealingly positioned at the intersection of theory and practice Joseph Cerami's book is an essential resource for students and researchers in search for a coherent picture of policy innovation and leadership of U S and U N efforts to design and implement Weapons of Mass Destruction policy initiatives
