Shaping History Ordinary People In European Politics 1500 1700:

Shaping History Wayne Ph Te Brake, 1998-07-13 A superb synthesis of popular politics in early modern western and central Europe Te Brake has cut across the barriers to find common properties and principles of variation in the politics of ordinary people Charles Tilly Columbia University *The Early Modern Dutch Press in an Age of Religious Persecution* David de Boer, 2023 This book traces the emergence of European humanitarian culture through the seventeenth and eighteenth centuries Drawing on an exceptionally rich body of pamphlets periodicals and newspapers it uncovers how victims of persecution first learned how to employ the printing presses in the Dutch Republic to raise transnational solidarity

War, Religion and Court Patronage in Habsburg Austria K. MacHardy, 2016-02-02 This case study of the causes of the Thirty Years War suggests an alternative framework to that of Absolutism and views statebuilding as an interactive bargaining process that can engender challenges to political authority It shows how selective court patronage changed the cultural habits of nobles in education manners and tastes but failed to transform religious identities which were intimately tied to noble interests Instead the confessionalization of patronage deepened divisions within the elite providing multiple incentives for the formation of an anti Habsburg alliance among Protestants in 1620 **A Cultural History of Food in the**

Early Modern Age Beat Kümin, 2014-05-22 The seventeenth and eighteenth centuries form a very distinctive period in European food history This was a time when enduring feudal constraints in some areas contrasted with widening geographical horizons and the emergence of a consumer society While cereal based diets and small scale trade continued to be the mainstay of the general population elite tastes shifted from Renaissance opulence toward the greater simplicity and elegance of dining la fran aise At the same time growing spatial mobility and urbanization boosted the demand for professional cooking and commercial catering An unprecedented wealth of artistic literary and medical discourses on food and drink allows fascinating insights into contemporary responses to these transformations A Cultural History of Food in the Early Modern Age presents an overview of the period with essays on food production food systems food security safety and crises food and politics eating out professional cooking kitchens and service work family and domesticity body and soul representations of food and developments in food production and consumption globally **Women, Texts and Authority**

in the Early Modern Spanish World Marta V. Vicente, Luis R. Corteguera, 2017-07-05 This is the first essay collection to examine the relation between text and gender in Spain from a broad geographical social and cultural perspective covering more than 300 years The contributors examine women and the construction of gender thematically dealing with the areas of politics law religion sexuality literature and economics and in a variety of social categories from Christians and Moriscos queens and merchants peasants and visionaries heretics and madwomen The essays cover different regions in the Spanish monarchy including Andalusia Aragon Castile Catalonia Valencia and Spanish America from the fifteenth century through to the eighteenth century Women Texts and Authority in Early Modern Spain focuses on two central themes gender relations in

the shaping of family and community life and women's authority in spheres of power. The representation of women in a variety of texts such as poetry, court cases or even account books illustrate the multifaceted world in which women lived, constantly choosing and negotiating their identities. The appeal of this collection is not limited to scholars of Spanish history and literature; it is deliberately designed to address the issue of how gender relations were constructed in the formation of modern society and therefore will be of interest to scholars of women's and gender history generally. Because of the emphasis on how this construction occurs in texts, the collection will also be attractive to scholars interested in literary studies and or print culture.

Theorizing European Integration Dimitris N. Chryssochoou, 2008-10-02 Fully revised and updated throughout. *Theorizing European Integration* 2nd edition provides a comprehensive introduction to the theoretical study of European integration. Combining perspectives from international relations, comparative politics and social and political theory, Dimitris N. Chryssochoou offers a complete overview of the many competing approaches that have sought to capture and explain the evolving political nature of the European Union (EU) and its qualitative transition from a union of states to a polity in its own right. Contemporary issues, themes and theories addressed include the different uses and current state of EU theorizing, state-centric accounts of integration and their critics, new normative challenges to the study of the EU, the political dynamics of European treaty reform, new forms of democracy, citizenship and governance, the limits and possibilities of EU constitutionalism, interdisciplinary understandings of EU polityhood, the introduction of a theory of organized synarchy, the transformations of state sovereignty in late modern Europe.

Empowering Interactions Wim Blockmans, Daniel Schläppi, 2017-03-02 The emergence of the state in Europe is a topic that has engaged historians since the establishment of the discipline of history. Yet the primary focus has nearly always been to take a top-down approach whereby the formation and consolidation of public institutions is viewed as the outcome of activities by princes and other social elites. Yet as the essays in this collection show, such an approach does not provide a complete picture. By investigating the importance of local and individual initiatives that contributed to state building from the late middle ages through to the nineteenth century, this volume shows how popular pressure could influence those in power to develop new institutional structures. By not privileging the role of warfare and of elite coercion for state building, it is possible to question the traditional top-down model and explore the degree to which central agencies might have been more important for state representation than for state practice. The studies included in this collection treat many parts of Europe and deal with different phases in the period between the late middle ages and the nineteenth century. Beginning with a critical review of state historiography, the introduction then sets out the concept of empowering interactions, which is then explored in the subsequent case studies and a number of historiographical, methodological and theoretical essays. Taken as a whole, this collection provides a fascinating platform to reconsider the relationships between top-down and bottom-up processes in the history of the European state.

Machiavelli and the Modern State Alissa M. Ardito, 2021-02-11 This book offers a significant reinterpretation of the history of republican

political thought and of Niccol Machiavelli's place within it. It locates Machiavelli's political thought within enduring debates about the proper size of republics. From the sixteenth century onward as states grew larger it was believed only monarchies could govern large territories effectively. Republicanism was a form of government relegated to urban city states anachronisms in the new age of the territorial state. For centuries history and theory were in agreement constructing an extended republic was as futile as trying to square the circle but then James Madison devised a compound representative republic that enabled popular government to take on renewed life in the modern era. This work argues that Machiavelli had his own Madisonian impulse and deserves to be recognized as the first modern political theorist to envision the possibility of a republic with a large population extending over a broad territory.

Popular Politics and the English Reformation Ethan H. Shagan, 2003. This book is a study of popular responses to the English Reformation. It takes as its subject not the conversion of English subjects to a new religion but rather their political responses to a Reformation perceived as an act of state and hence like all early modern acts of state negotiated between government and people. These responses included not only resistance but also significant levels of accommodation, co-operation and collaboration as people attempted to co-opt state power for their own purposes. This study argues then that the English Reformation was not done to people it was done with them in a dynamic process of engagement between government and people. As such it answers the twenty year old scholarly dilemma of how the English Reformation could have succeeded despite the inherent conservatism of the English people and it presents a genuinely post revisionist account of one of the central events of English history.

The Oxford Handbook of Gender, War, and the Western World Since 1600 Karen Hagemann, Stefan Dudink, Sonya O. Rose, 2020. To date war history has focused predominantly on the efforts of and impact of war on male participants. However this limited focus disregards the complexity of gendered experiences with war and the military. The Oxford Handbook of Gender War and the Western World since 1600 investigates how conceptions of gender have contributed to the shaping of military culture examining the varied ideals and practices that have socially differentiated men and women's wartime experiences. Covering the major periods in warfare since the seventeenth century The Handbook explores cultural representations of war and the interconnectedness of the military with civil society and its transformations.
