Sharks And Rays Of The World:

Reef Sharks and Rays of the World Scott W. Michael, 2006 **Sharks and Rays of the World** Doug Perrine, 2003-05-01
Examines the natural history and evolution of various species of sharks and rays members of the same subclass describing their physical characteristics feeding reproduction and human encounters **Rays of the World** Peter Last, Gavin Naylor, Bernard Séret, William White, Marcelo de Carvalho, Matthias Stehmann, 2016-12 Rays are among the largest fishes and evolved from shark like ancestors nearly 200 million years ago They share with sharks many life history traits all species are carnivores or scavengers all reproduce by internal fertilisation and all have similar morphological and anatomical characteristics such as skeletons built of cartilage Rays of the World is the first complete pictorial atlas of the world's ray fauna and includes information on many species only recently discovered by scientists while undertaking research for the book It includes all 26 families and 633 valid named species of rays but additional undescribed species exist for many groups Rays of the World features a unique collection of paintings of all living species by Australian natural history artist Lindsay Marshall compiled as part of a multinational research initiative the Chondrichthyan Tree of Life Project Images sourced from around the planet were used by the artist to illustrate the fauna This comprehensive overview of the world's ray fauna summarises information such as general identifying features and distributional information about these iconic but surprisingly poorly known fishes It will enable readers to gain a better understanding of the rich diversity of rays and promote wider public interest in the group Rays of the World is an ideal reference for a wide range of readers including conservationists fishery managers scientists fishers divers students and book collectors **The Biology of Sharks and Rays** A. Peter Klimley, 2013-07-31 The Biology of Sharks and Rays is a comprehensive resource on the biological and physiological characteristics of the cartilaginous fishes sharks rays and chimaeras In sixteen chapters organized by theme A Peter Klimley covers a broad spectrum of topics including taxonomy morphology ecology and physiology For example he explains the body design of sharks and why the ridged toothlike denticles that cover their entire bodies are present on only part of the rays bodies and are absent from those of chimaeras Another chapter explores the anatomy of the jaws and the role of the muscles and teeth in jaw extension seizure and handling of prey The chapters are richly illustrated with pictures of sharks diagrams of sensory organs drawings of the body postures of sharks during threat and reproductive displays and maps showing the extent of the species foraging range and long distance migrations Each chapter commences with an anecdote from the author about his own personal experience with the topic followed by thought provoking questions and a list of recommended readings in the scientific literature The book will be a useful textbook for advanced ichthyology students as well as an encyclopedic source for those seeking a greater understanding of these fascinating creatures *A Look Inside Sharks and Rays* Keith Edward Banister, 1995 Describes the world of sharks and rays and explains their lives and behavior As each page is turned acetate windows reveal layer by layer the anatomy of the great white shark and the manta ray

Sharks and Rays of the World (elasmobranch Fishes) ,1999 **Sharks of the World** David A. Ebert,Marc Dando,Sarah Fowler,2021-07-20 The most comprehensive reference guide to the world s sharks now fully revised and updated Sharks of the World is the essential illustrated guide for anyone interested in these magnificent creatures Now fully revised and updated it covers 536 of the world s shark species and is packed with colour illustrations colour photos and informative diagrams This comprehensive easy to use reference guide incorporates the latest taxonomic revisions of many shark families featuring many species that were only described in recent years It also includes a completely revised and expanded introduction and updated line drawings throughout Covers 536 shark species from around the world Features updated species accounts illustrations and maps Gives an illustrated overview of shark biology ecology and conservation Includes fin identification guides Provides a colour distribution map for every species **Sharks and Rays** Timothy C. Tricas,Leighton R. Taylor,1997 Maligned and misunderstood sharks are possibly the most feared yet the most fascinating sea creatures Of about 350 known species of shark only a handful are a threat to humans In reality it is humans who pose the greater threat hunting and fishing some species to the verge of extinction Diverse in appearance they range from the tiny cookiecutter or cigar shark to the massive whale shark Stranger still are the rays with names such as the banded stingaree and the Javanese cownose ray Curiously shaped like craft from outer space some are so highly colored they could be the creation of a whimsical painter This book represents the most up to date information and thinking on our understanding of these extraordinary inhabitants of the deep their highly developed senses and intellect and their ecology biology and behavior What is being done to protect them In what ways are they still being exploited Sharks and Rays highlights the advances being made in shark and ray conservation Sharks and Rays Fog City Press,2003 Encourages a better understanding of these creatures a chance to get closer to their real life world be it on a dive in their natural habitat or a visit to an aquarium **Sharks and Rays** Sharon Dalglish,2003 Takes you up close and personal with the creatures of the deep This title explores the shadowy world of rays It helps you discover different shark shapes and sizes and learn why sharks never have to worry about a broken tooth
