Shock Effect 11:

External Shocks, Policies, and Tail-Shifts in Real Exchange Rates Mr. Nicolas E Magud, Nicolas Magud, Samuel Pienknagura, 2023-06-23 We use panel quantile regressions to study extreme rather than average movements in the distribution of the real effective exchange rate REER of small open economies We document that global uncertainty VIX and global financial conditions U S monetary policy shocks have a strong impact on the distribution of the REER changes with larger impacts in the tails of the distribution and especially in economies with shallower FX markets lower central bank credibility and higher credit risk i e weaker macro fundamentals Foreign exchange intervention FXI partially offsets the impact of these shocks especially in the left tail large depreciations and particularly in economies with weaker fundamentals but more importantly when FXI is used sporadically Thus our results highlight the importance of deepening FX markets improving central bank credibility and strengthening macro fundamentals against the potential dynamic trade offs of overreliance on a policy that would exacerbate the previously mentioned frictions While our results point to low effectiveness of capital flow management in preventing large REER movements they seem to enable more impactful foreign exchange intervention in the immediate aftermath of shocks

The Missed Encounter of Radical Philosophy with Architecture Nadir Lahiji, 2014-04-10 The Missed Encounter of Radical Philosophy with Architecture brings together a respected team of philosophers and architecture scholars to ask what impact architecture has over today s culture and society For three decades critical philosophy has been in discourse with architecture Yet following the recent radical turn in contemporary philosophy architecture s role in contemporary culture is rarely addressed In turn the architecture discourse in academia has remained ignorant of recent developments in radical philosophy Providing the first platform for a debate between critics

architects and radical philosophers this unique collection unites these two schools of thought Contributors reason for or against the claim of the missed encounter between architecture and radical philosophy They discuss why our prominent critical philosophers devote stimulating writings to the ideological impact of arts on the contemporary culture music literature cinema opera theatre without attempting a similar comprehensive analysis of architecture By critically evaluating recent philosophy in relation to contemporary architecture The Missed Encounter of Radical Philosophy with Architecture presents a thorough understanding of the new relationship between architecture and radical philosophy Republic of Korea International Monetary Fund. National Aeronautics and Space Administration, **The Effects of Economic Shocks on Heterogeneous Inflation Expectations** Yoosoon Chang,Fabio Gómez-Rodríguez,Mr. Gee Hee Hong,2022-07 In this paper we examine how economic shocks affect the distribution of household inflation expectations We show that the dynamics of households expected inflation distributions are driven by three distinctive functional shocks which influence the expected inflation distribution through disagreement level shift and ambiguity Linking these functional shocks to economic shocks we find that contractionary monetary shocks increase the average level of inflation expectation with anchoring effects with a reduction in disagreement and an increase in the share of households expecting future inflation to be between 2 to 4 percent Such anchoring effects are not observed when the high inflation periods prior to the Volcker disinflation are included Expansionary government spending shocks have inflationary effects on both short and medium run inflation expectations while an increase in personal income tax shocks is inflationary for mediumrun A surprise increase in gasoline prices increases the level of inflation expectations but lowers the share of households with 2 percent inflation expectations The Journal of Laboratory and Clinical Medicine ,1916 **Energy Research Abstracts ,1986**
