Personal Diplomacy in the EU Roland Vogt, 2016-10-04 At a time when the economic troubles and bailouts of Greece and other European economies are casting significant doubt on the future viability of the Eurozone and the EU it is crucial to examine the origins of the political will and leadership that is necessary to move the integration process forward This book makes a significant conceptual and empirical contribution by elucidating the extent to which the integration process hinges not on institutions and norms but on the relations among leaders Vogt conducts a comparative diplomatic history of three critical junctures in the process of European integration the creation of the Common Market 1955 1957 British accession 1969 1973 and the introduction of the Euro 1989 1993 He illustrates how personal diplomacy leadership constellations and

the dynamics among leaders enable breakthroughs or inhibit accords He also reveals how the EU's system of top level decision making that privileges institutionalised summitry has operated in the past and suggests in a separate chapter why it has come to atrophy and prove more dysfunctional of late

Capital Rules Rawi Abdelal, 2009-09-30 The rise of global financial markets in the last decades of the twentieth century was premised on one fundamental idea that capital ought to flow across country borders with minimal restriction and regulation Freedom for capital movements became the new orthodoxy In an intellectual legal and political history of financial globalization Rawi Abdelal shows that this was not always the case Transactions routinely executed by bankers managers and investors during the 1990s trading foreign stocks and bonds borrowing in foreign currencies had been illegal in many countries only decades and sometimes just a year or two earlier How and why did the world shift from an orthodoxy of free capital movements in 1914 to an orthodoxy of capital controls in 1944 and then back again by 1994 How have such standards of appropriate behavior been codified and transmitted internationally Contrary to conventional accounts Abdelal argues that neither the U S Treasury nor Wall Street bankers have preferred or promoted multilateral liberal rules for global finance Instead European policy makers conceived and promoted the liberal rules that compose the international financial architecture Whereas U S policy makers have tended to embrace unilateral ad hoc globalization French and European policy makers have promoted a rule based managed globalization This contest over the character of globalization continues today

The 'Long 1970s' Poul Villaume, Rasmus Mariager, Helle Porsdam, 2016-04-28 Today it is widely recognised that the long 1970s was a decisive international transition period during which traditional collective oriented socio economic interest and welfare policies were increasingly replaced by the more individually and neo liberally oriented value policies of the post industrial epoch Seen from

a distance of three decades it is increasingly clear that these socio economic and socio cultural processes also found their expression at the level of national and international political power The contributors to this volume explore these processes of political cultural realignment and their social impetus in Western Europe and the Euro Atlantic area in and around the 1970s in the context of three agenda setting topics of international history of this period human rights including the impact of decolonisation East West dialogue in Europe and transnational relations and discourses Going beyond the so called Americanisation processes of the immediate postwar period this volume reclaims Europe's place and particularly that of smaller European nations in contemporary Western history demonstrating Europe's contribution to transatlantic transformation processes in political culture discourse and power during this period

Ruling by Statute Sebastian M. Saiegh, 2011-04-25 What are the main factors that allow presidents and prime ministers to enact policy through acts of government that carry the force of law Or simply put when does a government actually govern The theory presented in this book provides a major advance in our understanding of statutory policy making Using a combination of an original analytical framework and statistical techniques as well as historical and contemporary case studies the book demonstrates that contrary to conventional wisdom variations in legislative passage rates are the consequences of differences in uncertainty not partisan support In particular it shows that a chief executive's legislative success depends on the predictability of legislators voting behavior and whether buying votes is a feasible option From a normative standpoint the book reveals that governability is best served when the opposition has realistic chances of occasionally defeating the executive in the legislative arena

Fear of a Yellow Vest Planet Peter Wilkin, 2021-06-29 The Yellow Vest Gilets Jaunes protests that started in November 2018 have rocked French political culture and led critics to denounce the movement as being a threat to democracy or worse Among other things the protestors were accused of being barbarians philistines racists anti Semites and reactionaries who would destroy both France and European civilization In fact this book argues that the protests must be understood as part of a wave of protests against the extension of the market into all areas of social life that have been taking place around the world since the 1980s While the Yellow Vest protests embrace a range of actors that cut across the French political spectrum the agenda that rapidly emerged from the movement in the shape of the People's Directive shows that it is a broadly progressive protest that has articulated radical ideas and practices with a view to transforming French political culture by means of direct democracy The end goal is to be a new social order which is environmentally sustainable and built

around principles of social justice In this respect its ideas and actions are a challenge to mainstream French political culture
