Graverini,2025-09-18 Immersion used to be disregarded by academic scholarship as a secondary aspect of ancient narrative It was mostly considered typical of a passive reading style unworthy of intellectual consideration However the study of the immersive strategies adopted by ancient authors can often reveal intriguing and sometimes unsuspected layers of sophistication in their works This makes a valuable contribution to our understanding of ancient literary culture This is the first monograph that thoroughly analyses how Latin authors of narrative encourage their readers immersion in the fictional world an aspect of fictional literature that is essential to fully understand the artistry and sophistication of many ancient texts Immersed readers of fiction experience the narrative world and its inhabitants the fictional characters as if they were to some extent real This experience affects the readers visual imagination but also their emotional reactions physical sensations enactive responses and interpretive activities deeply engaging texts adopt various strategies to boost all these aspects of the reading experience they afford The book mobilizes the resources and methods of several scholarly approaches both

traditional and new to explore these strategies in ancient prose and verse narratives Detailed analysis of language and style is combined with a careful consideration of the more general features of ancient literary genres narratology joins forces with the study of emotions and with neurocognitive perspectives Reader immersion is a pervasive aspect of all kinds of narrative literature but it is more prominent in some texts than in others In this study Luca Graverini analyses a broad range of ancient narrative works spanning several centuries and different literary genres In purely chronological order these include the comedies of Plautus the Aeneid of Vergil the Metamorphoses of Ovid the tragedies of Seneca the Satyricon of Petronius and the Metamorphoses of Apuleius The interpretive approach adopted in this monograph can attract the interest of many readers with different backgrounds and working on different subjects
