Botsiou,Antonis Klapsis,2011-04-07 The global economy is still experiencing the effects of

the worst economic crisis since the Great Depression of the 1930s Over the last three years economies worldwide have slowed and international trade has declined Most importantly the crisis has negatively affected the lives of ordinary people creating a sense of uncertainty about the future and thus posing a direct threat to social cohesion thus posing new challenges to political leadership Climate change is also forcing the developed world to formulate a common strategy that will balance growth and environmental protection The aim of the book is to examine these international trends and comprehend the transformations that take place internationally The multi authored work presents several accounts on the course of vital aspects of politics and economy As a result the contents of the book focusses on four main subjects 1 global economic crisis and its consequences 2 economic governance 3 political leadership and 4 climate change Transatlantic Politics and the Transformation of the International Monetary System Michelle Frasher,2013-09-05 With original archival documents and interviews from the US and Europe Michelle Frasher brings the reader into the negotiating room with American German and French officials as they confronted the collapse of the Bretton Woods monetary system and made decisions that affected the course of European integration and the contemporary neoliberal order She identifies crisis as the catalyst for change in international monetary policies but argues that the causes of crisis originated from a multitude of factors such as market speculation American hegemony institutional flaws and ideational conflicts among the leaders themselves Far from a planned and consensual process this book shows that the transformation to neoliberalism was riddled with discord and fret with trial and error She argues that the resulting currency regime allowed governments to entrench themselves in national interests and facilitated the marketization of the state where states have become both clients and participants in the financialized global economy to the detriment of international stability Frasher s is the first work to connect the 1960s and 1970s to the difficulties of inter state and inter market cooperation that have plagued the system in the last decades and it puts the 2008 debacle into historical perspective **Transaction to a Common Currency: Journey to an Unknown Destination?** Gabriele Tacke,1999-04-01 Inhaltsangabe Abstract One Market One Money On paper the future of European Monetary Integration never looked more promising than now The Maastricht Treaty has finally been ratified by all twelve member governments in mid October 1993 even the most sceptical states Denmark and the U K so that the aim of European Monetary Union E M U rests on a solid legal basis now On January 1 1994 the European Monetary Institute E M I began its operations with a goal of intensifying monetary coordination in Europe In addition the E M I will prepare the conceptual groundwork for the activities of the future European Central Bank E C B The Road to a common Europe has been opened and monetary policy roadsigns point in the direction of European Monetary Union with a single currency In reality the prospects of the achievement of E M U have deteriorated in the course of 1993 and under present conditions the likelihood of a failure of the Maastricht Treaty is quite high The European currency crises in September 1993 led to realignments within the European Monetary System E M S and fluctuation margins were widened to 15 per cent These events and a breakdown of cooperation

between national monetary authorities have raised doubts about the feasibility of the timetable for moving towards full monetary union This thesis provides an overview of the progress towards a monetary union including a common currency in the European Community E C In addition it examines whether the approach to monetary union remains viable and if so the circumstances under which monetary union will eventually happen Inhaltsverzeichnis Table of Contents

**Europe United** Sebastian Rosato,2010-12-16 The construction of the European Community EC has widely been understood as the product of either economic self interest or dissatisfaction with the nation state system In Europe United Sebastian Rosato challenges these conventional explanations arguing that the Community came into being because of balance of power concerns France and the Federal Republic of Germany the two key protagonists in the story established the EC at the height of the cold war as a means to balance against the Soviet Union and one another More generally Rosato argues that international institutions whether military or economic largely reflect the balance of power In his view states establish institutions in order to maintain or increase their share of world power and the shape of those institutions reflects the wishes of their most powerful members Rosato applies this balance of power theory of cooperation to several other cooperative ventures since 1789 including various alliances and trade pacts the unifications of Italy and Germany and the founding of the United States Rosato concludes by arguing that the demise of the Soviet Union has deprived the EC of its fundamental purpose As a result further moves toward political and military integration are improbable and the economic community is likely to unravel to the point where it becomes a shadow of its former self **One World Currency** José
