OECD Economic Surveys: Chile 2007 OECD, 2007-11-26 This 2007 edition of OECD's periodic survey of Chile's economy focuses on key challenges being faced including managing the economy after the copper price boom efficiency in health care education and housing services informality and raising **Quantitative Energy Finance** Fred Espen Benth, Valery A. Kholodnyi, Peter Laurence, 2013-08-28 Finance and energy markets have been an active scientific field for some time even though the development and applications of sophisticated quantitative methods in these areas are relatively new and referred to in a broader context as energy finance Energy finance is often viewed as a branch of mathematical

finance yet this area continues to provide a rich source of issues that are fuelling new and exciting research developments. Based on a special thematic year at the Wolfgang Pauli Institute WPI in Vienna Austria this edited collection features cutting edge research from leading scientists in the fields of energy and commodity finance. Topics discussed include modeling and analysis of energy and commodity markets, derivatives, hedging and pricing, and optimal investment strategies, and modeling of emerging markets such as power and emissions. The book also confronts the challenges one faces in energy markets from a quantitative point of view as well as the recent advances in solving these problems using advanced mathematical, statistical and numerical methods. By addressing the emerging area of quantitative energy finance this volume will serve as a valuable resource for graduate level students and researchers studying financial mathematics, risk management or energy finance.
