Whyman, 2009-01-15 *Walking the Streets of Eighteenth Century London* will entertain and inform all who are interested in literature history and the city of London This unique book invites the reader to walk along the dirty crowded and fascinating streets of eighteenth century London in an unusual way Nine leading experts from the fields of literature history classics gender biography

geography and costume offer different interpretations of John Gay's poem *Trivia or the Art of Walking the Streets of London* 1716 The poem a lively funny and thought provoking statement about urban life accompanies the essays in a new edition with comprehensive notes The introduction paints a vibrant picture of London in 1716 depicting Gay's fascinating life and literary world offering an invaluable guide to the poem Together these elements allow the heat grime and smells of the underbelly of eighteenth century London come alive in new ways *Transport, Climate Change and the City* Robin Hickman, David Banister, 2014-02-05 Sustainable mobility has long been sought after in cities around the world particularly in industrialised countries but also increasingly in the emerging cities in Asia Progress however appears difficult to make as the private car still largely fuelled by petrol or diesel remains the mainstream mode of use Transport is the key sector where carbon dioxide CO2 emissions seem difficult to reduce Transport Climate Change and the City seeks to develop achievable and low transport CO2 emission futures in a range of international case studies including in London Oxfordshire Delhi Jinan and Auckland The aim is that the scenarios as developed and the consideration of implementation and governance issues can help us plan for and achieve attractive future travel behaviours at the city level The alternative is to continue with only incremental progress against CO2 reduction targets to sleepwalk into climate change difficulties oil scarcity a poor quality of life and to continue with the high traffic casualty figures The topic is thus critical with transport viewed as central to the achievement of the sustainable city and reduced CO2 emissions The City: Or, the Physiology of London Business; with Sketches On'Change, and at the Coffee Houses.
