Geological Survey Professional Paper ,1909 **Landslides - Disaster Risk Reduction** Kyoji Sassa,Philippo Canuti,2008-11-07 This book documents the First World Landslide Forum which was jointly organized by the International Consortium on Landslides ICL eight UN organizations UNESCO WMO FAO UN ISDR UNU UNEP World Bank UNDP and four NGOs International Council for Science World Federation of Engineering Organizations Kyoto Univ and Japan Landslide Society in Tokyo in 2008 The material consists of four parts The Open Forum Progress of IPL Activities Four Thematic Lectures in the Plenary Symposium Global Landslide Risk Reduction Six Keynote Lectures in the Plenary session and the aims and overviews of eighteen parallel sessions dealing with various aspects necessary for landslide disaster risk reduction such as observations from space climate change and slope instability landslides threatening heritage sites the economic and social impact of landslides monitoring prediction and early warning and risk management strategies in urban area etc Thus it enables the reader to benefit from a wide range of research intended to reduce risk due to landslide disasters as presented in the first global multi disciplinary meeting Geographic Uncertainty in Environmental Security Ashley Morris,Svitlana Kokhan,2007-09-14 On June 28 through July 1 2006 a NATO advanced research workshop was held in Kyiv Ukraine This meeting of scholars from both NATO and NATO partner countries brought together the leading researchers in the field of Fuzziness and Uncertainty in GIS for Environmental Security and Protection The papers based upon the presentations at this meeting are included in this book They were all quite good some focusing on the use of fuzzy sets in geography others focusing on explicit environmental concerns in Ukraine What this book cannot show is the camaraderie and spirit of cooperation that permeated the atmosphere of this workshop These researchers many of whom had never met before are now colleagues and are continuing to collaborate on research to this day and probably beyond Scholars from various positions and countries have chosen to work together in the spirit of cooperation to make the ideas presented in this book come to fruition At press time we do not know if Ukraine will become a NATO member or not In any case the editors wish to thank the NATO Science Committee for their funding encouragement and work in making this workshop a reality We hope that the spirit of cooperation and intellectual curiosity that was so lively at the conference will encourage the reader in the perusal of this work **Submarine Mass Movements and Their Consequences** D.C. underscore the societal and economic effects of submarine mass movements These events call upon the scientific community to understand submarine mass movement processes and consequences to assist in hazard assessment mitigation and planning Additionally submarine mass movements are beginning to be recognized as prevalent in continental margin geologic sections As such they represent a significant if not dominant role in margin sedimentary processes They also represent a potential hazard to hydrocarbon exploration and development but also represent exploration indicators and targets This volume consists of a collection of the latest scientific research by international experts in geological geophysical engineering and environment aspects of submarine mass failures focussed on understanding the full spectrum of challenges presented by submarine mass movements and their consequences
