Adolf Loos not only was part of the first wave of modern architecture but also served as an important source of inspiration for all architects who followed. He is emblematic of the turn of the century generation that was torn between the traditional culture of the nineteenth century and the innovative modernism of the twentieth. Loos's masterful astyle architecture is captured in this volume by the esteemed photographer Roberto Schenzer in over one hundred exceptional photographs. Starting with the refurbishment of his own apartment in 1903, twenty of Loos's most significant buildings are beautifully displayed. Villa Karma, the Krentner Bar, the Goldman, his commentary on architecture's position between art and function, plus subtle recollections of both the classic and the vernacular. All these plays were to subvert typical architectural expectations. Joseph Rosa's accompanying descriptions comprehensively discuss each building from the circumstances surrounding the realization of the projects to the use of Loos's architectural conventions.

**Materials and Meaning in Architecture** Nathaniel Coleman, 2020-02-20 Interweaving architecture philosophy and cultural history. Materials and Meaning in Architecture develops a rich and multi-dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation. Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes, this broad-ranging study shows how the most engaging built works are as tactile as they are sensuous, communicating directly with the bodily senses, especially touch. It explores the theme of material imagination and the power of establishing place identity in an architect's work, to consider the enduring expressive possibilities of material use in architecture. The book's chapters can be dipped into, each individual chapter providing close readings of built works by selected modern masters: Scarpa, Zumthor, Williams, and Tsien. Insights into key texts and theories: Ruskin, Loos, Bachelard, or short cultural histories of materials: wood, brick, concrete, steel, and glass. And yet taken together, the chapters build to a powerful book-length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design. It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment. With insights for a wide range of readers ranging from students through to researchers and professional designers, Materials and Meaning in Architecture will cause theorists to rethink their assumptions and designers to see new potential for their projects.
