Theodore Hoppen,2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone s first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen s study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation **Biographical Dictionary of British Prime Ministers** Robert Eccleshall,Graham Walker,2002-06-01 The Biographical Dictionary of British Prime Ministers is a wide ranging comprehensive guide to the political lives of Britain s prime ministers from Sir Robert Walpole to Tony Blair Written by some of the leading authorities on British politics this authoritative dictionary provides essential information about each

The Forging of the Modern State Eric J. Evans, 2018-07-16 In what has established itself as a classic study of Britain from the late eighteenth century to the mid Victorian period Eric J Evans explains how the country became the world's first industrial nation His book also explains how and why Britain was able to lay the foundations for what became the world's largest empire Over the period covered by this book Britain became the world's most powerful nation and arguably its first super power Economic opportunity and imperial expansion were accompanied by numerous domestic political crises which stopped short of revolution The book ranges widely across key political diplomatic social cultural economic and religious themes in order to convey the drama involved in a century of hectic but generally constructive change Britain was still ruled by wealthy landowners in 1870 as it had been in 1783 yet the society over which they presided was unrecognisable Victorian Britain had become an urban industrial and commercial powerhouse This fourth edition coming more than fifteen years after its predecessor has been completely revised and updated in the light of recent research It engages more extensively with key themes including gender national identities and Britain's relationship with its burgeoning empire Containing illustrations maps an expanded Framework of Events and an extensive Compendium of Information on topics such as population change cabinet membership and significant legislation the book is essential reading for all students of this crucial period in British history
