except the sparsely populated northern island of Hokkaid It is possible therefore to illuminate the general experience by scrutinizing a section of the whole The section selected here is Akita a prefecture of northern Japan whose forests are among the nation s most famous Three considerations make this choice attractive The topic has clearly delineated boundaries largely because the Akita region was a single coherent political unit during the Edo period the documentation on the early modern forest situation there is extensive and accessible finally and as a consequence of the second factor Japanese scholars have already published excellent studies on key aspects of Akita forestry These factors have made this a relatively convenient area to examine and discuss in the short compass of this study
