Sindjoun, 2010-08-15 The Coming African hour is not a slogan nor wishful thinking It is a conclusion that derives from an insightful analysis of the current situation pertaining on the continent Several African scholars coming from different regions and academic backgrounds are elaborating ideas and arguments in order to explain the constraints and to illustrate the opportunities The result of that scientific gathering is a book that synthesizes and renews the reflections on development What is at stake is not to be pessimistic or optimistic about Africa The epistemological challenge is to understand what is going on By focusing on converging and diverging African realities on the issues of state civil society gender and development strategies the authors of the book show under which conditions the African hour is coming At that level the commitment for political science meets the commitment for Africa The main success of this book is to overcome the preconceived ideas and self fulfilling prophecies about Africa Here the analysis avoids the trap of indulgence then hope is based on truth Consequently the coming African hour is not inescapable it is as analyzed a possibility that its achievement depends on institutional human political social and economic factors European External Action Veit

Bachmann, 2017-02-24 European External Action provides a critical assessment of the practice of EU diplomacy in a key site of Africa European relations and the global development industry the Kenyan capital of Nairobi It analyses how the EU positions itself through its newly established diplomatic corps the European External Action Service EEAS and how it is perceived as a collective geopolitical actor by its external cooperation partners Going beyond existing studies on EU policy making in Brussels and African European relations more generally this book explores in a novel way the conduct of external

relations and perceptions of the EU abroad Based on institutional ethnography within the EU Delegation in Nairobi and research affiliation with the University of Nairobi as well as interviews with leading individuals of Kenyan European interaction it analyses the practices processes and perceptions through which EU diplomacy is enacted and realised in a strategic node of global North South relations In light of the EU s claim as a key partner for developing countries and its ambition to be a major player in global politics European External Action thereby speaks not only to wider debates on the EU s role as a global and development actor but also provides new insights in the internal dynamics and the making of external agency in and through EU diplomacy

Revitalising Communities in a Globalising World Lena Dominelli, 2018-02-06 Revitalising

Communities in a Globalising World explores the opportunities and constraints that the dynamics of globalisation present for human development in a range of different countries and situations. Arguing that globalisation is currently a system of organising social relations along neoliberal lines, this timely volume examines practical examples of how people respond to significant social changes in their communities. The idea of communities is deconstructed to show that globalisation has collapsed the boundaries of time, space and place in ways that have exacerbated inequalities at the same time giving rise to unparalleled riches for some. The book encompasses a number of case studies that speak to policymakers, practitioners, educators and students interested in studying globalisation and making the most of its potential for change.

Social Welfare in Global Context James Midgley, 1997-03-26 James Midgley provides a broad overview of social welfare, outlining key institutions, terminology, historical research and approaches. He also details reasons for the existence of international social welfare and the challenges that arise from it. The author includes an important section on applied international social welfare that addresses the concerns of practitioners, concerns that have been neglected in much of the literature in the field. An entire section of the book is devoted to issues of social work practice, social development, the activities of international agencies and their collaborative efforts. While practical application is an important focus of the book, several chapters deal with key theoretical debates in the field. The author also includes descriptive chapters that provide comprehensive accounts of world social conditions and social welfare institutions. As a textbook on international social welfare, *Social Welfare in Global Context* is primarily intended for students and practitioners of social work, social administration and social policy. But it is also relevant for students of sociology, public policy and economics.

The Oxford Handbook of Professional Economic Ethics George F. DeMartino, Deirdre N. McCloskey, 2016-01-04 For over a century the economics profession has extended its reach to encompass policy formation and institutional design while largely ignoring the ethical challenges that attend the profession's influence over the lives of others. Economists have proven to be disinterested in ethics. Embracing emotivism, they often treat ethics as a matter of mere preference. Moreover, economists tend to be hostile to professional economic ethics, which they incorrectly equate with a code of conduct that would be at best ineffectual and at worst disruptive to good economic practice. But good ethical reasoning is not reducible to mere tastes, and professional ethics is not reducible to a code. Instead, professional economic ethics refers to a new field of investigation, a tradition of sustained and lively inquiry into the irrepressible ethical entailments of academic and applied economic practice. *The Oxford Handbook of Professional Economic Ethics* explores a wide range of questions related to the nature of ethical economic practice and the content of professional economic ethics. It explores current thinking that has emerged in these areas while widening substantially the terrain of economic ethics. There has never been a volume that poses so directly and intensively the question of the need for and content of professional ethics for economics. The Handbook incorporates the work of leading scholars and practitioners, including academic economists from various theoretical traditions, applied economists beyond academia whose work has

direct and immense social impact and philosophers professional ethicists and others whose work has addressed the nature of professionalism and its implications for ethical practice **Change a Life, Change your Own** Peter

Ove,2018-06-11T00:00:00Z Change a Life Change Your Own is a long overdue adult discussion about how child sponsorship a spectacularly successful fundraising tool infantilizes both donor and recipient turning good intentions into paternalism and reinforcing stereotypical Western ideas about helplessness and hopelessness in developing countries Ian Smillie author of The Charity of Nations Freedom from Want and Diamonds Change a Life Change Your Own For less than a dollar a day For the cost of one coffee a day With these slogans and their accompanying images of poor children some of the world s largest development organizations invite the global North to engage in one of their most prominent and successful fundraising techniques child sponsorship But as Peter Ove argues in Change a Life Change Your Own child sponsorship is successful not because it addresses the needs of poor children but because it helps position what it means to live ethically in an unequal and unjust world In this way child sponsorship is seen as more than an effective marketing tool it is a powerful mechanism for spreading particular ideas about the global South the global North and the relationship between the two Through sponsorship the desire to raise money secure appropriate childhoods and become better people ends up taking priority over the goal of living together well on a global scale Drawing on in depth interviews with child sponsors and sponsorship staff Change a Life Change Your Own explores the contexts in which sponsorship promotional material is produced interpreted and acted upon This is not an expos on the use of sponsorship dollars or high administrative costs it is a clearly written and compelling account of how the problem of development is constructed such that child sponsorship is seen to be a rational and ethical solution Development in the Third World: From Policy Failure to Policy Reform Kempe Ronald Hope,

Sr.,2016-09-16 This book is a study of Third World economic development and the factors which have made development so elusive It discusses the policy reform necessary to spur development as well as the relationship between development theory and policy The author argues that the key to successful development policy is through reduced state intervention and that to the extent state intervention is necessary it should be through rather than against the market mechanism **The**

Administration of International Organizations Michael D.V. Davies,2017-07-05 Drawing on his extensive practical experience as an international civil servant in a number of organizations Davies writes in a lively and readable manner about all aspects of administrative policy and its related implications Divided into two parts the first Top down will enable policy makers in government academia and elsewhere who have an interest in the proper governance and management of international institutions to gain fresh insight into the topic The second part Bottom up provides a substantial body of knowledge of administrations including case studies of best and worse practice The book includes analysis of The UN system International Financial Institutions Co ordinated Organizations Regional European Institutions The Consultative Group for International Agricultural Research This is a work that fills a well defined gap in organizational knowledge in a rigorous but

accessible way It is essential reading for both practitioners and academics involved with international organizations

Child Soldiers, Adult Interests John-Peter Pham, 2005 This book weaves a narrative of the history of Sierra Leone from its foundation as a settlement for black slaves who fought for the British Crown during the American Revolution through the events of the civil war with a discussion of more general geopolitical lessons to be learned from the recent conflict its origins and settlement In addition the book contains six appendices that render the present work the first comprehensive history of Sierra Leone since the classic studies published more than a generation ago by Christopher Fyfe and John Peterson an invaluable reference on conflict resolution in general as well as the West African country in particular including a chronology of select events in the history of Sierra Leone and the texts of the peace agreements and other post conflict documents
