Handbook of Latin American Politics Peter Kingstone, Deborah J. Yashar, 2013-03-05 Latin America has been one of the critical areas in the study of comparative politics The region's experiments with installing and deepening democracy and promoting alternative modes of economic development have generated intriguing and enduring empirical puzzles In turn Latin America's challenges continue to spawn original and vital work on central questions in comparative politics about the origins of democracy about the relationship between state and society about the nature of citizenship about the balance between state and market The richness and diversity of the study of Latin American politics makes it hard to stay abreast of the developments in the many sub literatures of the field The Routledge Handbook of Latin American Politics offers an intellectually rigorous overview of the state of the field and a thoughtful guide to the direction of future scholarship Kingstone and Yashar bring together the leading figures in the study of Latin America to present extensive empirical coverage new original research and a cutting edge examination of the central areas of inquiry in the region The Markets for Force Molly Dunigan, Ulrich Petersohn, 2015-01-21 The Markets for Force examines and compares the markets for private military and security contractors in twelve nations Argentina Guatemala Peru Ecuador the United Kingdom the Czech Republic Ukraine Russia Afghanistan China Canada and the United States Editors Molly Dunigan and Ulrich Petersohn argue that the global market for force is actually a conglomeration of many types of markets that vary according to local politics and geostrategic context Each case study investigates the particular characteristics of the region's market how each market evolved into its current form and what consequence the privatized market may have for state military force and the provision of public safety The comparative standpoint sheds light on better known markets but also those less frequently studied such as the state owned and managed security companies in China militaries working for private sector extractive industries in Ecuador and Peru and the ways warlord forces overlap with private security companies in Afghanistan An invaluable resource for scholars and policymakers alike The Markets for Force offers both an empirical analysis of variations in private military and security companies across the globe and deeper theoretical knowledge of how such markets develop Contributors Olivia Allison Oldrich Bures Jennifer Catallo Molly Dunigan Scott Fitzsimmons Maiah Jaskoski Kristina Mani
