### **Educational Research for Social Justice**

Alistair Ross,2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good Using a social constructivist approach the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers We discuss how many terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good

EBOOK: Retention and Student Success in Higher Education Mantz Yorke, Bernard Longden, 2004-03-16 What is the policy background to current interest in retention and student success? What causes students to leave institutions without completing their programmes? How can theory and research help institutions to encourage student success? Retention and completion rates are important measures of the performance of institutions and higher education systems. Understanding the causes of student non-completion is vital for an institution seeking to increase the chances of student success. The early chapters of this book discuss retention and student success from a public policy perspective. The later chapters concentrate on theory and research evidence and on how these can inform institutional practices designed to enhance retention and success particularly where students are enrolled from disadvantaged backgrounds. This book draws upon international experience particularly from the United Kingdom, Australia, South Africa and the United States. Retention and Student Success in Higher Education is essential reading for lecturers, support staff and senior managers in higher education institutions and for those with a wider policy interest in these matters.

Student Lives in Crisis Lorenza Antonucci, 2016-09-21 The greatest social change in Europe during the last twenty years is that almost half of Europe's young people now attend college. Yet despite these unprecedented levels of university attendance the lived experiences of students remain largely undocumented. Focusing on the effects of the financial crisis and austerity this empirically grounded analysis compares the lives of university students from three very different European welfare systems: Italy, England and Sweden. By contrasting access to welfare support in connection with the role of families, the state and the labor market postgraduation, *Student Lives in Crisis* exposes the students' often overlooked social realities as well as the impact of their shared experience of financial uncertainty. Drawing on questionnaires and first person interviews, Lorenza Antonucci reveals the misconceptions behind many higher education policies in Europe, demonstrating that university participation exacerbates rather than ameliorates inequalities among young people from different social backgrounds.

*Higher Education Funding and Access in International Perspective* Sheila Riddell, Sarah Minty, Elisabeth Wheedon, Susan Whittaker, 2018-05-09 This book explores the way in which the twin pressures of globalisation and localisation play out in higher education across the developed world, often reflected in more specific debates on fees, regimes, access and culture.
