Sykes, 2008-02-12 In this book the author describes some aspects of being a marine biologist that might be of most interest to the inquisitive reader It does not deal with scientific matters but describes some of the more amusing events in a career that extended over forty years beginning with university training and extending through employment as a field biologist with the U S Fish and Wildlife Service and ending with being a Laboratory Director with the National Oceanic and Atmospheric Administration NOAA In the field studies of fisheries the author undertook research assignments along the Atlantic coast from Massachusetts through Florida with intensive studies of fish populations in the Connecticut Delaware York Mattaponi Pamunkey James Chickahominy Roanoke Neuse Edisto Ogeechee and St Johns Rivers The studies ranged from determining estimates of sizes of spawning runs of shad and striped bass to the design of fish passage facilities where the runs were blocked to upstream spawning by existing or proposed dams As one might expect many intriguing and sometimes amusing events occurred during these studies some of which are described These episodes ranged from a hazardous ride down the Delaware River in a confiscated canoe through a clandestine meeting with an American Indian Tribe in the middle of the night to a battle with a staff member over ballpoint pens Through means of various job advancements the author later became a biological research leader in Florida where he found himself heavily immersed in such administrative duties as the management of research people and budgets These ten years are noted however as the most interesting and rewarding of the author s career because it gave him the opportunity of testing his legs and using his imagination to create his own version of how things should be run in marine science There he pushed for and succeeded in developing a staff that published its findings rather than let them sit in unused files He persuaded fishery officials of the Gulf States to join his lab in developing a cooperative Gulf of Mexico Estuarine Inventory which was published and is still useful today He and his lab staff took a case of land development to the Supreme Court and won on the basis of fish and wildlife values These are examples of pleasant accomplishments and fun things that occurred during the author s career Work with other biologists of the Gulf and South Atlantic States had its ups and downs but as a whole was very pleasant He found that the less he had to deal with politicians and the more with scientists or science administrators the better off he was After almost ten years of running the Florida lab Jim transferred to Sandy Hook New Jersey for a brief stay and then back to Beaufort NC to become Chief of the Division of Fisheries This too was an interesting set of duties in that it dealt with an emerging interest in sport fishery research on such species as grouper and king mackerel and also the commercial menhaden fishery The latter he could have done without in that the job was full of frustrations with an industry that thought it owned all of the fish stocks and should not practice any conservatism in harvesting them Also having a chief in the Washington office who agreed with them over the dead bodies of NOAA biologists did not help As an antidote however the author also became involved in

helping membership growth of the American Institute of Fishery Research Biologists after being elected to serve a two year term as its President Eventually came retirement and on to a less stressful environment although emerging from one which had been both successful and enjoyable The author settled down to two main activities that of woodworking or decoy carving and furniture building and serving on the Morehead City Planning Board and on the North Carolina Coastal Resources Commission To those enterprises he was able to ap
