Lost Architectures:

Lost Buildings Jonathan Glancey, 2008 Have you ever wished that you could have seen King Solomon's mighty Temple in Jerusalem or climbed to the top of the legendary Tower of Babel? What must it have been like to have paraded up and down the great glass galleries of the Crystal Palace in London in 1851? Why is the Euston Arch demolished in 1961 still missed? What would buildings described in much loved books have been like if these had existed outside their author's imaginations? Imagine walking through the labyrinthine corridors of Mervyn Peake's mythical Gothic fortress Gormenghast or visiting Toad Hall. And what of the current trend for reconstructing buildings which were destroyed in wartime or for political reasons? *Lost Buildings* is an invitation to visit buildings long vanished or those demolished within living history: some by dim politicians, others by war or acts of God, that we would pay good money and travel a long way to see if only they existed today. It looks too at buildings from literature, myth and children's stories and some lost opportunities: fantastic, ambitious designs that were never built. There are countless buildings that remain vivid in the collective memory, whether they were once real or were only ever imagined. *Lost Buildings* brings these together for the reader's curiosity and delight.

Lost Architectures Neil Spiller, 2001-03-23 This book stands in opposition to the popular notion that the best architecture is built on compromise. Rather, Neil Spiller argues, the most original and brave products of the architectural mind are often to be found in those projects which, for whatever reason, never came to fruition. *Lost Architectures* presents an array of such projects from the last decades of the twentieth century, constituting the unrealised dreams of some of the most inspirational architects working in the period. Most of the projects featured here have seldom, if ever, been published before and some represent the last hand-drawn work of their creators before the age of the computer finally came into full force. Whilst they do not follow any specific style, these projects embody a spirit defined by Spiller as New Romanticism: a spirit which combines elements of aesthetic decadence and a certain camp mannerism with a love of angularity and mechanised ritual. Some of the architects in question are still in practice with a great deal of high-profile built work behind them; others have never been recognised as they perhaps should have been. In both cases, this book is an invaluable resource of information and inspiration for students of architecture as well as for theorists, historians and lay readers. It provides essential exposure for a range of work of great vitality which might otherwise risk being lost in the course of time.

Buffalo Architecture Reyner Banham, Charles Beveridge, Henry-Russell Hitchcock, Buffalo Architectural Guidebook, 1981-10-19 Buffalo's rich architectural and planning heritage has attracted the attention of several prominent historians whose work here is accompanied by over 250 illustrations and photographs. For its size, the city of Buffalo, New York, possesses a remarkable number and variety of architectural masterpieces from the late nineteenth and early twentieth centuries. Adler and Sullivan's Prudential building, H. H. Richardson's massive Buffalo State Hospital, Richard Upjohn's St. Paul's Episcopal Cathedral, five prairie houses by Frank Lloyd Wright, and buildings by Daniel Burnham, Albert Kahn, and the firms of McKim, Mead and White, and Lockwood, Green and Company, among others. These structures by prominent outsiders served to spur the efforts of local architects, builders, and craftsmen, and all of them were built within the context of the city-wide park and parkway system designed by Frederick Law Olmsted. In addition, the city and its environs exhibit representative works by more recent architects among them Eero and Eliel Saarinen, Walter Gropius, Marcel Breuer, Paul Rudolph, Minoru Yamasaki, and the firm of Skidmore, Owings and Merrill. Buffalo's rich architectural and planning heritage has attracted the attention of several prominent historians capable of the challenge of evaluating its significance. Reyner Banham is one of the world's leading authorities on the theory and practice of architecture, and he has written extensively on design in the industrial age, and Buffalo's innovative manufacturing plants and grain elevators are important exemplars of such design. Charles Beveridge, whose essay covers the park and parkway system, is editor of the Olmsted papers at The American University. And Henry Russell Hitchcock is the dean of American architectural historians and the organizer of a 1940 exhibition on Buffalo's built environment. Their essays are followed by seven sections that delineate the city's neighborhoods, each provided with a map, neighborhood history, and a full complement of photographs with descriptive building captions. An eighth section, 'Lost Buffalo,' describes demolished buildings, chief among them Wright's great Larkin Administration building, while the remaining sections venture out of town, exploring Erie and Niagara Counties, other parts of Western New York, and southern Ontario.

From the Temple to the Castle Lee Morrissey, 1999

Visiting Britain in the mid 18th century Andre Rouquet wrote that in England more than in any other country every man would fain be his own architect Not surprisingly then several of the most important 18th century British authors were also practicing architects John Vanbrugh a playwright designed Blenheim Palace the poet Alexander Pope offered architectural drawings for redesigning the houses of friends and Horace Walpole claimed that the home he renovated Strawberry Hill inspired his Novel The Castle of Otranto The work of John Milton and Thomas Gray also exhibits an abiding interest in architecture By examining the connections between literature and architecture in the work of these writers and by viewing architecture in literary terms Lee Morrissey traces a narrative of cultural change in the Augustan age and beyond A literary scholar with a strong background in architectural theory and practice Morrissey examines architectural references made by these authors and architectural publications familiar to them Each chapter establishes a connection with architecture in the careers of an author and then describes how a principal text *Paradise Lost* *The Provoked Wife* *An Essay on Man* *Elegy Written in a Country Churchyard* and *The Castle of Otranto* focuses the literary and historical issues of the period in architectural terms While some 20th century architectural theorists have worried that treating architecture in literary terms robs it of its social function Morrissey argues that architecture can be a language and still participate in political and social contexts because language itself is political and social The fruit of his argument is a unique intellectual history of late 17th and early 18th century Britain of use to scholars of architectural history and landscape architecture as well as of literature
