Graham Rawle's Lost Consonants III Graham Rawle, 1993 All social researchers need to think about ethical issues Their salience has recently been increased by the pressures of ethical regulation particularly in the case of qualitative research But what are ethical issues And how should they be approached These are not matters about which there is agreement Ethics in Qualitative Research explores conflicting philosophical assumptions the diverse social contexts in which ethical problems arise and the complexities of handling them in practice The authors argue that the starting point for any discussion of research ethics must be the values intrinsic to research above all the commitment to knowledge production However the pursuit of inquiry is rightly constrained by external values and the book focuses on three of these minimising harm respecting autonomy and protecting privacy These external values are shown to be far from unequivocal in character often in conflict with one another or with the commitments of research and always subject to situational interpretation and practical judgment Nevertheless it is contended that in the present challenging times it is essential that qualitative researchers uphold research values Martyn Hammersley is Professor of Educational and Social Research at The Open University Anna Traianou is Senior Lecturer in the Department of Educational Studies Goldsmiths University of London **Stuttering** Barry Guitar, Stuttering Foundation, The, 2008 The authors of this book show how it is possible and desirable to integrate and coordinate the two most commonly used therapy approaches and retain the advantages of both methods in order to obtain even more satisfactory results P iii **Instructor**, 1979-08 **The Malahat Review**, 2003 **Registers** Clark Coolidge, 1994 Poetry Music is another of Coolidge's grammars which is to say that music provides the rules structure the
