impacted naval warfare The Law of Armed Conflict and the Use of Force Frauke Lachenmann, Rüdiger Wolfrum, 2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law American Military History Daniel K. Blewett, 2008-12-30 In this companion volume to his 1995 bibliography of the same title Daniel Blewett continues his foray into the vast literature of military studies As did its predecessor it covers land air and naval forces primarily but not exclusively from a U S perspective with the welcome emergence of small wars from publishing obscurity In addition to identifying relevant organizations and associations Blewett has gathered together the very best in chronologies bibliographies biographical dictionaries indexes journals abstracts glossaries and encyclopedias each accompanied by a brief descriptive annotation This work remains a pertinent addition to the general reference collections of public and academic libraries as well as special libraries government documents collections military and intelligence agency libraries and historical societies and museums Jutland 1916 Innes McCartney, 2018-04-26 The Battle of Jutland was the largest naval battle and the only full scale clash of battleships in the First World War For years the myriad factors contributing to the loss of many of the ships remained a mystery subject only to speculation and theory In this book marine archaeologist and historian Dr Innes McCartney reveals for the first time what became of the warships that vanished on the night of 31st May 1916 examining the circumstances behind the loss of each ship and reconciling what was known in 1916 to what the archaeology is revealing today The knowledge of what was present was transformed in 2015 by a ground breaking survey using the modern technology of multi beam This greatly assisted in unravelling the details behind several Jutland enigmas not least the devastating explosions which claimed five major British warships the details of the wrecks of the 13 destroyers lost in the battle and the German warships scuttled during the night phase This is the first book to identify the locations of many of the wrecks and scandalously how more than half of these sites have been illegally plundered for salvage despite their status as war graves An essential and revelatory read for anyone interested in naval history and marine archaeology **Silent Killers** James P. articles by leading archaeologists on the key methods used by archaeologists in the field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods *The Oxford Handbook of Maritime Archaeology* Alexis Catsambis, Ben Ford, Donny L. The Aesthetics of Ruins Robert Ginsberg, 2021-08-04 This book constructs a theory of ruins that celebrates their vitality and unity in aesthetic experience Its argument draws upon over 100 illustrations prepared in 40 countries Ruins flourish as matter form function incongruity site and symbol Ruin underlies cultural values in cinema literature and philosophy Finally ruin guides meditations upon our mortality and endangered world

Tu sais, mon vieux Jean-Pierre John Willis, 2017-04-28 Tu sais mon vieux Jean Pierre is inspired by the work of archaeologist Jean Pierre Chrestien 1949 2008 who worked hand in glove with a generation of researchers in helping to unearth unexpected and always interesting aspects of New France Contributions focus first upon the door to New France in the Gulf of St Lawrence Newfoundland and Acadia A second set of essays move further up the St Lawrence and into the heartland of the continent The final section examines aspects of Canadian culture popular art religion and communication The essays share a curiosity for material culture a careful regard for detail and nuance that forms the grain of New France studies and sensitivity to the overall context that is part and parcel of how history proceeds on the local or regional scale Happily we can now dispense with old fashioned and facile generalizations about the allegedly absent bourgeoisie the purportedly deficient commercial ethic of the habitants and the so called underlying military character of the colony and get down the business of understanding real people and their possessions in context Published in French

Shores, Surfaces and Depths Felicity Picken, Emma Waterton, 2024-11-26 This book examines the oceanic presence in life on Earth and the ways that we engage with the oceanic worlds for play pleasure adventure and the pursuit of leisure and escape through tourism and travel The oceanic turn across the social sciences and humanities has produced a still proliferating opus of work that seeks to discover and emphasize oceanic presence in life on Earth This literal and figurative unearthing of blue spaces has encouraged scholars to gaze beyond the lands that have supported much of our experience and knowledge towards the gathering up of a more holistic appreciation of blue planetary life This widening of scholarly attention from land to sea is occurring simultaneously across a range of disciplines and fields including history archaeology anthropology comparative literature public policy cultural studies and geography With an explicit focus on leisure and tourism this edited collection follows a growing appreciation that it is our seemingly inconsequential encounters at play for pleasure and on holidays that are increasingly present and influential in our oceanic relations This volume will be of value to scholars and students interested in social and cultural history and environmental history and humanities
