Money Finance:

Money, Finance, Reality, Morality Edward Hadas, 2023-11-25 Conventional explanations of the nature of money are weighed down by bad ideas and irrelevant historical evidence The standard theory of finance is hampered by the lack of both sociological and ethical contextualization and by sloppy thinking about numbers and time Money Finance Reality Morality addresses those weaknesses with truly novel models of how the economy money and finance actually work The book analyses the perception of money as an economic tool as compared to a symbolic and sociological object as a highly functional quantitative token that assigns numerical values to the inherently unmeasurable economic activities of labour and consumption It looks at finance as an often inferior solution to economic problems and a tool for helping the poor support the rich And it explains how the tolerance of greed makes the money finance system the weakest link in modern economies Money Finance Reality Morality written without jargon or maths will be of interest to students teachers and practitioners in economics and finance government and politics religion philosophy and sociology Author Edward Hadas is a Research Fellow at Blackfriars Hall Oxford University UK He was formerly an economics editor and columnist for Reuters Breakingviews He also worked on the Financial Times influential Lex column following 25 years as a financial analyst with firms such as Morgan Stanley and Putnam Investments
