grapple with and incorporate critical numismatic material into the emerging discipline of Greek lexicography including foundational work by F Preisigke and E Kiessling before outlining his own methodological approach Theophilos then examines the resources available for engaging with the numismatic material and presents a series of specific case studies throughout the New Testament material His carefully annotated images of coins draw readers in to a greater understanding of the material culture of the Greco Roman world and how this impacted upon the Greek language and the New Testament

The Archaeology of Early Medieval and Medieval South Asia Swadhin Sen, Supriya Varma, Bhairabi Prasad

Sahu, 2022-11-30 This book looks at the ways in which archaeological methods have been used in debates concerning the early medieval and medieval periods in South Asia. Despite the incorporation and use of archaeological data to corroborate historical narratives, the theories and methods of archaeology are largely ignored in and excluded from the dominating institutionalized and hegemonic disciplinary discourses. The volume offers contesting insights, polemical narratives, and new data from archaeological contexts to initiate a debate on many foundational premises of archaeological and historical narratives. It focuses on the much neglected region of the Eastern Ganga-Brahmaputra Basin as a spatial frame to do this and studies themes such as spatial and temporal scales of concepts and methods, multi-scalar factors and processes of continuity and change, the settlement archaeology of the alluvial landscape, changing patterns of agrarian transformation and material cultures including coins, inscriptions, pottery, and sculptures in their contexts in sub-regional, regional, and supra-regional intersections. Dedicated to historian Brajadulal Chattopadhyaya, this volume presents a crucial and unprecedented intervention in the study of the early medieval and the medieval periods. It will be useful for scholars and researchers of archaeology, ancient history, medieval history, water history, earth sciences, palaeoecology, historical ecology, epigraphy, art history, material culture studies, Indian history, and South Asian studies in general.

Iron Age and Roman Coin Hoards in Britain Roger Bland, Adrian Chadwick, Colin Haselgrove, David Mattingly, 2020-06-30 More coin hoards have been recorded from Roman Britain than from any other province of the Empire. This comprehensive and lavishly illustrated volume provides a survey of over 3260 hoards of Iron Age and Roman coins found in England and Wales with a detailed analysis and discussion. Theories of hoarding and deposition are examined, national and regional patterns in the landscape settings of coin hoards are presented together with an analysis of those hoards whose findspots were surveyed and of those hoards found in archaeological excavations. It also includes an unprecedented examination of the containers in which coin hoards were buried and the objects found with them. The patterns of hoarding in Britain from the late 2nd century BC to the 5th century AD are discussed. The volume also provides a survey of Britain in the 3rd century AD as a peak of over 700 hoards are known from the period from AD 253-296. This has been a particular focus of the project which has been a collaborative research venture between the University of Leicester and the British Museum, funded by the AHRC. The aim has been to understand the reasons behind the burial and non-recovery of these finds. A comprehensive online database (<https://finds.org.uk/database>) underpins the project which also undertook a comprehensive GIS analysis of all the hoards and field surveys of a sample of them.

The Radical Jesus, the Bible, and the Great Transformation Douglas E. Oakman, 2021-01-25 The Radical Jesus offers a companion to the author's previous article collection Jesus and the Peasants Even more than in Jesus and the Peasants these eleven chapters sharpen the focus on the political economic meaning of Jesus then and the deeper values embodied in him that perhaps are still pertinent for now Part One considers his activities and aims within the political economy of first century Galilee Part Two offers perspectives on the critical hermeneutical task of linking the values of Jesus and the Bible to a world that has undergone what Karl Polanyi called the Great Transformation Polanyi argued persuasively in his 1944 book that economy in the pre industrial age was embedded in social relations and served necessary social purposes while society after the Great Transformation became embedded within market capitalist economy to the detriment of social relations This book finds in sustained critical dialog with the Radical Jesus another transforming force and a guiding light toward a more humane economy and society that will serve human need rather than selfish greed
