Nurbs For Curve And Surface Design:

The NURBS Book Les Piegl, Wayne Tiller, 2012-12-06 Until recently B spline curves and surfaces NURBS were principally of interest to the computer aided design community where they have become the standard for curve and surface description Today we are seeing expanded use of NURBS in modeling objects for the visual arts including the film and entertainment industries art and sculpture NURBS are now also being used for modeling scenes for virtual reality applications These applications are expected to increase Consequently it is quite appropriate for The N U R B S Book to be part of the Monographs in Visual Communication Series B spline curves and surfaces have been an enduring element throughout my professional life The first edition of Mathematical Elements for Computer Graphics published in 1972 was the first computer aided design interactive computer graphics textbook to contain material on B splines That material was obtained through the good graces of Bill Gordon and Louie Knapp while they were at Syracuse University A paper of mine presented during the Summer of 1977 at a Society of Naval Architects and Marine Engineers meeting on computer aided ship surface design was arguably the first to examine the use of B spline curves for ship design For many B splines rational B splines and NURBS have been a bit mysterious **NURBS for curve and surface design** Gerald E. Bianca Falcidieno,Tosiyasu L. Kunii,2012-12-06 In the history of technology many fields have passed from an initial stage of empirical recipes to a mature stage where work is based on formal theories and procedures This transition is made possible through a process called modeling Also Computer Graphics as a separate field of Computer Science makes extensive use of formal theories and procedures of modeling often derived from related disciplines such as mathematics and physics Modeling makes different application results consistent unifying varieties of techniques and formal approaches into a smaller number of models by generalizing and abstracting the knowledge in Computer Graphics This volume presents a selection of research papers submitted to the conference Modeling in Computer Graphics Methods and Applications held at the Research Area of the National Research Council in Genoa Italy on June 28 July 1 1993 This meeting was the ideal continuation of a previous conference organized in Tokyo Japan in April 1991 The success and the variety of research themes discussed at that meeting suggested to promote a new working conference on methods and applications of modeling to be held in Italy two years later
