Nurse Patient Communication:

Nurse-patient Communication Garland K. Lewis, 1969 **Communication for Nurses: Talking with Patients** Lisa Kennedy Sheldon, 2008-12-17 Communication for Nurses offers direct effective techniques that are delivered in a concise user friendly format that enables readers to develop a professional communication style Topics include nursing communication and developmental theories issues of cultural diversity and patient rights concepts and interviewing techniques are presented for starting and developing the nurse patient relationship communicating with specific groups including patients of different ages patients with physical impairments and patients in crisis The Second Edition has been completely revised and updated with new enhanced sections on emotional work in nursing working with unmotivated patients and communicating with colleagues In addition Web sites have been included throughout to provide additional learning resources *Improving Nurse-patient Communication Using the Teach-back Method* Sheila R. Smallwood, 2018 Effective nursing communication considers health literacy the person's ability to understand and make health decisions based on the information given Health professionals often overestimate the health literacy of patients thereby affecting patient outcomes In a hospital environment patients rate the ability of the nurse to explain things in a way patients understand by completing the Hospital Consumer Assessment of Healthcare Providers and Systems HCAHPS after discharge The HCAHPS results are converted to a score which is used in a formula to determine hospital reimbursement the lower the score the lower the reimbursement The purpose of this project was to improve nurse communication skills and facilitate patient understanding of care A literature review revealed the teach back method as a best practice strategy Teach back is a communication technique designed to improve patient understanding about what was said by healthcare providers Teach back is a way of presenting information then asking patients to repeat what was said in their own words An education module designed to improve nurse communication skills was implemented on a 14 bed hospitalist medical unit for the registered nurse staff N 13 The education included content on health literacy and the teach back method of communication Nursing staff was surveyed before 61 5% response rate and six weeks following 50% response rate the educational offering using the Health Professionals Communication Skills Scale HP CSS an 18 item tool measuring empathy informative communication respect and social skills In addition patient responses to the HCAHPS question the nurse explained things in a way you could understand were compared before and after the educational offering Overall the post survey responses were lower than the pre survey responses in each domain indicating a decreased perception of communication by the nursing staff The aggregate mean score for informative communication decreased from 5 01 to 4 83 p 0 37 and social skills decreased from 3 85 to 3 75 p 0 87 on the post survey with significant aggregate mean score decreases for respect 5 46 to 4 76 p **Patient-Provider Communications: Caring to Listen** Valerie A. Hart, 2009-09-25 Patient Provider Communications Caring to Listen offers specific patient communication for advanced practice nurses Role plays for different clinical situations with varying patient

populations provide a bridge for implementing communication strategies in the clinical setting Each chapter gives a brief synopsis of current communication theories that relate to the topic and which drive communication strategies with patients Communication and Journaling exercises are included at the end of each chapter Accompanied by PowerPoint Slides 2010
