Mercedes Chadwick hasn't quite completed her newest film but she's already courting controversy. The World War II epic frankly portrays the homosexuality of a real life hero and the storm of advance media buzz surrounding it has drawn the fury of extremist groups. But despite a relentless campaign of angry E-mails, phone calls and smear tactics, Chadwick won't be pressured into abandoning the project. Then the harassment turns to death threats. While the FBI appears on the scene, nervous Hollywood associates call in troubleshooters and now Chadwick has an army of round the clock bodyguards whether she likes it or not. And she definitely doesn't. But her stubbornness doesn't make FBI agent Jules Cassidy's job any easier. The fiercely independent filmmaker presents yet another emotional obstacle that Cassidy doesn't need. He's already in the midst of a personal tug of war with his ex-lover while fighting a growing attraction to Chadwick's brother. Determined to succeed and survive on her own terms, Chadwick will face off with enemies and allies alike. But she doesn't count on the bond she forms with the quiet, capable Cosmo Richter. Yet even as their feelings bring them closer, the noose of deadly terror all around them draws tighter. And when all hell erupts, desire and desperate choices will collide on a killing ground that may trap them both in the crossfire.

in numerical analysis newton s method also known as the newton raphson method named after isaac newton and joseph raphson is a root finding algorithm which produces successively better approximations to the roots or zeroes of a real valued function the most basic version starts with a single variable function  $f$  defined for a real variable  $x$  the function  $s$  derivative  $f'$  and an initial guess  $x_0$  for a root of  $f$  if the function satisfies sufficient assumptions and the initial guess is close
