## **Nursing As Caring A Model For Transforming Practice:**

*Nursing as Caring* Anne Boykin, 2001 Describes a new theory of nursing as caring and caring as a way of nurses living in the world This theory provides a view that can be lived in all nursing situations and can be practiced alone or in combination with other theories Illustrates the practical meaning of the theory in a range of nursing situations discusses nursing service administration from the perspective of the theory and offers strategies for transforming nursing education based on nursing as caring Boykin is dean and professor at the Christine E Lynn Center for Caring College of Nursing Florida Atlantic University Schoenhofer teaches graduate nursing at Alcorn State University c Book News Inc      **Nursing As Caring** Savina Schoenhofer, Anne Boykin, Anne Boykin, PhD, MN, 2015-12-28 *Nursing as Caring A Model for Transforming Practice* By Anne Boykin and Savina O Schoenhofer *Nursing as Caring A Model for Transforming Practice* sets forth a different order of nursing theory This nursing theory is personal not abstract In order to express nursing as caring there is a clear need to know self as caring person The focus of the Nursing as Caring theory then is not toward an end product such as health or wellness It is about a unique way of living caring in the world It is about nurses and nursed living life and nurturing growing humanly through participation in life together The study of human caring as a unique and essential characteristic of nursing practice has gradually expanded from early definitional philosophical and cultural research on the meanings of caring to the explication of theoretical definitions of caring conceptual models proposed taxonomy of caring concepts a great deal of creative experimentation with research methodologies and the development of several theories of caring In general one may say that knowledge of caring has grown in two ways first by extension and more recently by intension Growth by extension consists of a relatively full explanation of a small region which is then carried over into an explanation of adjoining regions Growth by extension can be associated with the metaphors of building a model or putting together a jigsaw puzzle Kaplan 1964 p 305 In growth by intension a partial explanation of a whole region is made more and more adequate and outlines for subsequent theory and observation are clarified Growth by intension is associated with the metaphor of gradually illuminating a darkened room A few persons enter the room with their individual lights and are able to slowly perceive what is in that room As more persons enter the room it becomes more fully illuminated and the observed reality is clarified

**An Introduction to Psychological Care in Nursing and the Health Professions** Helena Priest, 2013-03-01 Caring is at the core of what nurses and other health professionals do But caring

encompasses more than simply looking after people's physical health needs. People requiring any health service will have psychological needs that affect their feelings, thoughts, and behaviour. Good psychological care can even help improve physical health outcomes. An Introduction to Psychological Care in Nursing and the Health Professions explains and promotes the importance of psychological care for people when they become physically ill, giving a sound theoretical basis to ensure care is evidence based. It encourages the reader to think about the effects of illness and disability on patients and to understand what can be done to identify and minimise any difficulties they might be experiencing in these areas. The chapters cover the meaning and elements of care and holistic care, a model of psychological care in practice, the personal qualities and skills of carers that best underpin psychological care delivery, and how these might be enhanced, the knowledge needed for effective psychological care, giving psychological care as it might be practised in a range of health care settings. This text contains key learning points, practical activities, reflective exercises, and case illustrations. It is ideal for student and practising nurses and health professionals who would like to improve their care for patients in this essential area.

Spirituality in Nursing: Standing on Holy Ground Mary Elizabeth O'Brien, 2021-02-09. Spirituality in Nursing: Standing on Holy Ground, Seventh Edition, addresses the relationship between spirituality and nursing practice across a variety of settings related to caring for the ill and infirm.

Nursing Theories Julia B. George, 1995. Designed as a tool to help nurses apply nursing concepts and theories to actual nursing practice, this book considers the ideas of well-known nursing theorists and relates the work of each to the nursing process of assessing, diagnosing, planning, implementing, and evaluating. Chapters include interpretation and discussion of each component and applies these in nursing situations. Advanced nursing students
