Translational Oral Health Research Jukka H. Meurman, 2018-06-18 This book is the first to be devoted to translational research which aims to expedite the transfer of knowledge gained in the lab to clinical practice within the field of oral health. It is examined how basic sciences and basic research are providing new methods and materials that will enable clinicians to treat patients more effectively. Readers will gain a translational perspective on a variety of oral conditions and related systemic diseases. Individual chapters are devoted to such topics as dental biomaterials implants and tissue engineering. The importance of evidence based research and the roles and comparative value of preclinical and clinical trials are also highlighted. Knowledge of translational and clinical research is essential in understanding how new inventions and developments are being accomplished and what regulations and guidelines need to be taken into account when planning studies and not forgetting the ethical aspects of any research. **Translational Oral Health Research** is the first book to be devoted entirely to the subject and it will be of interest to both researchers and practitioners.

Nutrition in the Prevention and Treatment of Disease Ann M. Coulston, Carol J. Boushey, Mario Ferruzzi, Linda Delahanty, 2017-04-28 Nutrition in the Prevention and Treatment of Disease Fourth Edition is a compilation of current knowledge in clinical nutrition and an overview of the rationale and science base of its application to practice in the prevention and treatment of disease. In its fourth edition this text continues the tradition of incorporating new discoveries and methods related to this important area of research. Generating and analyzing data that summarize dietary intake and its association with disease are valuable tasks in treating disease and developing disease prevention strategies. Well founded medical nutrition therapies can minimize disease development and related complications. Providing scientifically sound creative and effective nutrition interventions is both challenging and rewarding. Two new chapters on metabolomics and translational research which have come to be used in nutrition research in recent years. The new areas of study are discussed with the perspective that the application of the scientific method is by definition an evolutionary process. A new chapter on Genetics and Diabetes which reviews the latest research on causal genetic variants and biological mechanisms responsible for the disease and explores potential interactions with environmental factors such as diet and lifestyle. Includes all major omics the exposome metabolomics genomics and the gut microbiome. Expands the microbiota portions to reflect complexity of diet on gut microbial ecology metabolism and health.

Eye Nutrition Adrian Fung, Brad Townend, Marcia Townend, 2014-03-19 This book provides up to date expert medical advice on nutrition for eye health. Written by ophthalmologists and a dietician it explains how to optimise your diet for good vision and when vitamin supplements may be required.

Handbook of Nutrition, Diet, and the Eye Victor R Preedy, 2014-04-01 The Handbook of Nutrition Diet and the Eye is the first book to thoroughly address common features and etiological factors in how dietary and nutritional factors affect the eye. The ocular system is perhaps one of the least studied organs in diet and nutrition yet the consequences of vision loss can be devastating. One of the biggest contributors to complete vision loss in the western hemisphere is diabetes precipitated by metabolic

syndrome In some developing countries micronutrient deficiencies are major contributory factors to impaired vision However there are a range of ocular defects that have either their origin in nutritional deficiencies or excess or have been shown to respond favorably to nutritional components The eye from the cornea to the retina may be affected by nutritional components Effects may be physiological or molecular This book represents essential reading for nutritionists dietitians optometrists ophthalmologists opticians endocrinologists and other clinicians and researchers interested in eye health and vision in general Saves clinicians and researchers time in quickly accessing the very latest details on a broad range of nutrition ocular health and disease issues Provides a common language for nutritionists nutrition researchers optometrists and ophthalmologists to discuss how dietary and nutritional factors and related diseases and syndromes affect the eye Preclinical clinical and population studies will help nutritionists dieticians and clinicians map out key areas for research and further clinical recommendations Handbook of Clinical Nutrition and Aging Connie Watkins Bales, Julie L. Locher, Edward
