Mikesky,2013-11-27 Revised and updated to keep pace with the growing changes in the field the Fourth Edition of Practical Applications in Sports

Nutrition provides students and practitioners with the latest sports nutrition information and dietary practices and prepares them to assist athletes and fitness enthusiasts in achieving their personal performance goals. Early chapters provide an introduction to sports nutrition and give a thorough explanation of macronutrients, micronutrients, and water and their relation to athletic performance. Later chapters focus on the practical and applied aspects of sports nutrition, including behavior change through consultations and weight management. Chapter 15 targets the unique nutrition requirements of special populations such as athletes who are pregnant, vegetarian, or have chronic diseases. The text concludes with a chapter dedicated to helping readers discover the pathway to becoming a sports dietitian through education and experience.

New to the Fourth Edition:

- New discussion of sports nutritionists as evidence-based practitioners.
- Current MyPlate food group recommendations.
- Revised discussion of the relationship between current body weight and carbohydrate intake, as well as the types and the amounts of carbohydrates that should be consumed during exercise.
- New Food For Thought callouts identifying related material in Sports Nutrition Workbook and Assessments.
- Updated statistics, guidelines, and regulations found throughout the text, including obesity statistics, carbohydrate intake, and vitamin needs.

Sports Nutrition for Masters Athletes Peter G. Nickless, 2024-10-15

Discover the nutritional and physiological age-related changes and needs of athletes aged 35 and above. Athletic activity is becoming increasingly central to the lives of many adults as they age. More and more adults over 35 participate actively in athletics. Additionally, older adults are increasingly encouraged to pursue athletics for reasons of health and wellness. There is a growing need, therefore, for sports nutrition and physiology texts that focus on this population in detail and not simply as a subset of a field that has been primarily oriented towards younger athletes. *Sports Nutrition for Masters Athletes* meets this need with an intensive evidence-based approach to the nutritional needs of athletes over the age of 35. Alert to the importance of diet in performance and the requirements of older athletes, the book offers a robust toolkit for maintaining athletic performance with age while adjusting for physiologic changes. The result is an essential contribution to a growing field of research and clinical practice. *Sports Nutrition for Masters Athletes* readers will also find:

- An overview of physiological changes associated with the aging process and their impact on performance.
- Detailed insights into the relationship between nutrition and the mitigation of the inflammatory process.
- Coverage of subjects including the determination of caloric and nutrient needs, dietary strategies, and many more.

Sports Nutrition for Masters Athletes is ideal for those pursuing education in nutrition, exercise science, exercise physiology, health and wellness, and physical education. It will also be of interest to those studying physical aging or working with older adults as clients and patients.
