Mineral Tolerance of Animals National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Minerals and Toxic Substances in Diets and Water for Animals, 2006-01-22 Excess minerals in the diet and water of animals can have an adverse effect on animal health consumers and the environment Preventing unsafe mineral exposure is a fundamental part of animal nutrition and management At the request of the Food and Drug Administration the National Academies convened a committee to make recommendations on animal tolerances and toxic dietary levels updating a 1980 report on mineral tolerance in domestic animals Based on a review of current scientific data and information the report sets a maximum tolerable level MTL for each mineral as it applies to the diets of farm animals poultry and fish The report includes an analysis of the effects of toxic levels in animal diets and it identifies elements that pose potential human health concerns The report recommends research that includes a better characterization of animal exposure to minerals through feedstuffs a better understanding of the relationship between mineral concentrations in feed and water and the levels in consumer products such as meat milk and eggs and more research on the maximum tolerable level of minerals for aquatic and companion animals

Clinical Nutrition of the Essential Trace Elements and Minerals John D. Bogden, Leslie M. Klevay, 2000-07-26 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the

consequences 7 virtually no overlap of information between chapters but targeted inter chapter referrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient questions which are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the choice of chapter authors The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then invite the leading authorities from around the world to be part of their initiative The authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences
