The Subject of Anthropology Henrietta L. Moore, 2007-03-26 In this book new book the author draws on anthropology feminism and psychoanalysis to develop an original and provocative theory of gender and of how we become sexed beings Using detailed ethnographic data from Melanesia and Africa to explore the strengths and weaknesses of a range of theories in anthropology feminism and psychoanalysis the author advocates an ethics of engagement based on a detailed understanding of our differences and similarities in the ways in which local communities and western scholars have imaginatively deployed the power of sexual difference She demonstrates the importance of ethnographic listening of focused attention to people's imaginations and of how this illuminates different facets of complex theoretical issues and human conundrums

The Oedipus Complex Éric Smadja, 2017-10-16 This book examines the contentious relationship between psychoanalysis and anthropology as it has played out in disputes surrounding the Oedipus complex Here ric Smadja explores the complicated historical and epistemological conditions leading up to the emergence of the conflict between the two disciplines He considers the origins of each science the creation of the Oedipus complex and the place role and influence of Freud's key and controversial work Totem and Taboo both in the history of psychoanalysis and as it connects with anthropology internationally Focusing on such key figures as Bronislaw Malinowski Ernest Jones Franz Boas Georges Devereux Emile Durkheim Claude Levi Strauss and Jacques Lacan Smadja charts the course of the debate as it unfolded during the twentieth century and tracks its contemporary status of the debate with a focus on figures in both France and the United States Discussing the divergences and convergences between the two fields he compares and contrasts their historical epistemological and methodological features and reflects on the new acculturative disciplines emerging from their interaction The book concludes with a look at what the conflictual history of these two human sciences can tell us about the history of ideas and their processes and modes of communication Exploring a dispute which reaches back to the very beginnings of psychoanalysis and anthropology The Oedipus Complex will appeal to psychoanalysts in practice and in training psychotherapists and academics and students of psychoanalytic studies anthropology and the history of ideas

Ethnopsychanalysis George Devereux, 1978

A Non-oedipal Psychoanalysis? Philippe Van

Haute,Tomas Geyskens,2012 The different psychopathologic syndromes show in an exaggerated and caricatural manner the basic structures of human existence These structures not only characterize psychopathology but they also determine the highest forms of culture This is the credo of Freud s anthropology This anthropology implies that humans are beings of the in between The human being is essentially tied up between pathology and culture and normativity cannot be defined in a theoretically convincing manner The authors of this book call this Freudian anthropology a patho analysis of existence or a clinical anthropology This anthropology gives a new meaning to the Nietzschean dictum that the human being is a sick animal Freud and later Lacan first developed this anthropological insight in relation to hysteria in its relation to literature This patho analytic perspective progressively disappears in Freud s texts after 1905 This book reveals the crucial moments of that development In doing so it shows clearly not only that Freud introduced the Oedipus complex much later than is usually assumed but also that the theory of the Oedipus complex is irreconcilable with the project of a clinical anthropology The authors not only examine the philosophical meaning of this thesis in the work of Freud They also examine its avatars in the texts of Jacques Lacan and show how this project of a patho analysis of existence inevitably obliges us to formulate a non oedipal psychoanalytic anthropology

Psychoanalytic Anthropology After Freud David H. Spain,1992 **The Journal of Psychoanalytic Anthropology** ,1987 *Beneath the Crust of Culture* Howard F. Stein,2004 This impressive book by Howard Stein one of the most insightful and important cultural analysts writing today offers a profound understanding of how social problems ranging from xenophobia terrorism and school violence to natural disasters and corporate downsizing are exacerbated provoked and sometimes even produced by our deepest psychological needs and vulnerabilities forces of which we are largely unaware but which we can come to understand and thus deal with more productively through a method of psychoanalytically informed cultural analysis that Stein both explains and performs in this eminently readable and engaging book The insights and methodology offered here are indispensable for any cultural workers

Culture, Politics and Race in the Making of Interpersonal Psychoanalysis Roger Frie,Pascal Sauvayre,2022-05-23 Winner of the 2023 American Board Academy of Psychoanalysis Book Prize Culture Politics and Race in the Making of Interpersonal Psychoanalysis traces the emergence of Interpersonal Psychoanalysis and demonstrates how the radical cross disciplinary dialogues that form its foundation are relevant to present day social and cultural challenges Psychoanalysts today are grappling with how to address a host of societal and political crises In the 1930s a similar set of crises led a group of progressive practitioners and scholars to engage in a radical cross disciplinary dialogue that became the foundation for Interpersonal Psychoanalysis Pioneering psychoanalysts created a form of thought and practice that viewed human suffering through the wider lens of society and culture and provided a means to address the pervasive issues of racism sexuality and politics in human experience With contributions from leading psychoanalysts and scholars and by making use of original sources this book evidences the significance of this approach to understanding marginalisation today Written in an open and

accessible fashion Culture Politics and Race in the Making of Interpersonal Psychoanalysis demonstrates the importance of the early interpersonal cultural school for the present moment The book will appeal to a broad audience in psychoanalysis and psychotherapy the history of medicine and social and cultural theory *Giving Life, Giving Death* Lucien Scubla, 2016-09-01 Although women alone have the ability to bring children into the world modern Western thought tends to discount this female prerogative In *Giving Life Giving Death* Lucien Scubla argues that structural anthropology sees women as objects of exchange that facilitate alliance building rather than as vectors of continuity between generations Examining the work of L vi Strauss Freud and Girard as well as ethnographic and clinical data *Giving Life Giving Death* seeks to explain why in constructing their master theories our greatest thinkers have consistently marginalized the cultural and biological fact of maternity In the spirit of Freud s Totem and Taboo Scubla constructs an anthropology that posits a common source for family and religion His wide ranging study explores how rituals unite violence and the sacred and intertwine the giving of death and the giving of life *The Unhappy Divorce of Sociology and Psychoanalysis* Lynn Chancer, John Andrews, 2014-08-05 A collection of 18 contributions by well known scholars in and outside the US *The Unhappy Divorce of Sociology and Psychoanalysis* shows how sociology has much to gain from incorporating rather than overlooking or marginalizing psychoanalysis and psychosocial approaches to a wide range of social topics New Directions in Psychological Anthropology Theodore Schwartz, Geoffrey M. White, Catherine A. Lutz, 1992 The field of psychological anthropology has changed a great deal since the 1940s and 1950s when it was often known as Culture and Personality Studies Rooted in psychoanalytic psychology its early practitioners sought to extend that psychology through the study of cross cultural variation in personality and child rearing practices Psychological anthropology has since developed in a number of new directions Tensions between individual experience and collective meanings remain as central to the field as they were fifty years ago but alongside fresh versions of the psychoanalytic approach other approaches to the study of cognition emotion the body and the very nature of subjectivity have been introduced And in the place of an earlier tendency to treat a culture as an undifferentiated whole psychological anthropology now recognizes the complex internal structure of cultures The contributors to this state of the art collection are all leading figures in contemporary psychological anthropology and they write about recent developments in the field Sections of the book discuss cognition developmental psychology biology psychiatry and psychoanalysis areas that have always been integral to psychological anthropology but which are now being transformed by new perspectives on the body meaning agency and communicative practice
