Psychological Warfare and India Dr Arunkumar Bhatt, 2015-03-16 Wars are born in human mind Great military leaders belonging to all times and cultures have always tried to influence the minds of their foes and friends alike to facilitate their own victories by making their enemies hesitant The minds concerned could be influenced with a variety of overt and covert actions that send right signals to the target audiences In the words of Allied Supreme Commander of the World War II Gen Dwight Eisenhower these actions are anything from the singing of a beautiful anthem to the most extraordinary kind of physical sabotage This is Psychological Warfare and the most preferred action is communication Dr Arunkumar Bhatt who being a defence journalist knows nuances of communication and unfolds here this soft kill strategy and its tactics He traces the history of the psychological warfare to establish how steadily its importance has grown It became a war winning factor in the Great War and its role further expanded in the World War II The Psywar as it has come to be known among many names has not looked back since then The advances in science and technology revolution in communication and information technologies have greatly enhanced the range and effectiveness of the psychological warfare in terms of both time and space The Revolution in Military Affairs has been further sharpening the Psywar weapons Dedicated Psywar units and even commands backed by elements in formation staff are in the vogue The Psychological Warfare has now found a place among war by other means It is recognised as a command function and is factored in planning at all levels It is so important that the decision to deploy the psy weapons is taken at the top echelon of the high command and this is done much ahead of the breaking out of hostilities Where does India that has a poor strategic culture and still poorer awareness about its security

stand vis vis Psywar Indian culture has instances of the Psywar It was being practised in the ancient period Kautilya recommends it strongly Different invaders used it The British practised it in an institutionalised fashion to rule India India did counter the British psywar but in a rather irregular way India used it successfully in some of the post independence wars but the country needs to do much more to protect itself against Psywar attacks and to use it effectively to enhance its own security in the present day multi threat scenario This is an attempt to table a calling attention motion before the nation

Barger,2014-08-15 Military and civilian agencies conducted Psychological Operations on an unprecedented scale during the Vietnam War Emphasis on PSYOP from MACV and the U S Mission resulted in the creation of an interagency organization providing direction to the overall PSYOP effort The military PSYOP force supporting MACV underwent a series of organizational changes over seven years as the force struggled to meet ever increasing demands but never reached their full potential in Vietnam Difficulties in measuring effectiveness combined with a lack of understanding of PSYOP techniques and capabilities more often than not resulted in the relegation of PSYOP to supporting sideshow status rather than the full integration into supported unit planning necessary for success However the evolution of the PSYOP force and reports from participants provide numerous lessons learned applicable to current operations under the aegis of the Global war on Terrorism *Terrorism and Homeland Security* Dale L. June,2010-09-29 Since 9 11 the terms homeland security and terrorism have become firmly entrenched in our lexicon The days of walking through a simple metal detector at the airport are over and our security landscape is forever changed Terrorism and Homeland Security Perspectives Thoughts and Opinions brings together the work of academic researchers and law *AU Press, Your Air and Space Power Publisher, 2003* ,2003 *BattleSpace of Mind* Michael Joseph McCarron,2024-02-29 The Nazi s never surrendered and planned their 4th Reich using neurocognitive weapons Going underground their technology made it s way to S America the Soviet Union the United States among other places We all are bound by the new rules of corporate fascism long planned by Himmler and his main strategy for a 4th Reich financial control Are we all just living in a computer controlled information battlespace continued from World War II This book dissects the matrix of control used by advanced military industrial powers it breaks down the technology bit by bit so you have an understanding how technology is being used in a battle for your mind I address these issues from a veteran s insight as a former Signal Intelligence specialist and with some background in the Intelligence Community I bring forth countermeasures to this control showing you how you can safeguard your mind from these attacks Countermeasures that are not available anywhere in the commercial world yet without them you will be easy prey for these directed targeted pulse modulated attacks first used by the Nazis *Handbook of Research on Deception, Fake News, and Misinformation Online* Chilawa, Innocent E.,Samoilenko, Sergei A.,2019-06-28 The growing amount of false and misleading information on the internet has generated new concerns and quests for research regarding the study of deception and

Strategy And Defense Policy For Small States: Problems And Prospects Bernard F W Loo,2021-11-08 For students of Strategic Studies in small countries with limited financial human and military resources the available literature on Strategic Studies in particular texts that seek to explain the key concepts and components of Strategic Studies can be very alien in its focus to the strategic conditions and issues that these countries face This book contains a collection of essays that seeks to discuss key concepts in Strategic Studies as well as contemporary challenges in strategy and defence policy from the perspective of small states It is based on the idea derived from the German philosopher of war Carl von Clausewitz that there is a distinction between logic and grammar while the field of Strategic Studies contains a number of key concepts such as geopolitics and geostrategy strategic culture arms dynamics and the phenomenon of military modernization that are universal in logic the grammar that is the specific manifestations of these concepts in the contexts of small states is necessarily different from larger more materially endowed states Related Link s
